.NET Full Stack Developer

Apply Now

Company: Dental Corporation

Location: Melbourne

Category: computer-and-mathematical

Opportunity Snapshot: An exciting permanent opportunity has become available for a **.NET Full Stack Developer**

Responsible for the analysis, design, coding and testing activities with an expectation of contributing to implementation activities.

You are an integral part of a cross-functional team, expecting to deliver high-quality applications built using .NET, React and NextJs technologies that meet or exceed business and customer expectations.

You will be requested to contribute to development activities on .Net core, React, NextJs applications and Azure.

How will I help?

Work on .Net Core API and web applications to deliver business requirements with high quality.

Our innovative and proactively facilitate change: Thinking creatively for 'out-of-the-box' solutions come naturally and thrive on challenges requiring innovation.

Actively collaborate and work with senior developers in completing

development, design and maintenance activities.

Plan and organise: Set clearly defined objectives, plan activities and projects well in advance, and consider changing circumstances. You manage time effectively and monitor performance against deadlines and milestones.

Apply Expertise & Technology: Apply specialist and detailed technical expertise while developing knowledge through continuous learning and development.

Action-Oriented: Decisive while balancing risks. Show initiative and take accountability for your actions and projects.

Keep abreast of industry 'best practice' methods in Applications Solution development.

Able and willing to learn new technologies required for the job.

What do I need?

4+ years of experience in software development and 2+ years in API and integration

2+ years' experience with front-end development including but not limited to; HTML, CSS, JS, AJAX, React, JQuery and above.

Evidence in the successful delivery of .Net core API, hence undertaking system analysis, solution (functional & Technical) design and feasibility activities.

Experience with NextJS and NodeJS is preferred.

Experience working with Microsoft Azure Platform. Especially Azure Service Bus and Azure Functions

Having prior experience with Azure B2C is a beneficial factor.

Experience working with Microsoft SQL Server and creating Store Procedures

Experience in working with containerise environment

Experience in monitoring and supporting complex enterprise applications.

Good understanding and experience in implementing testable software using best practices and design patterns, hence developing high-quality code and regression tests that leverage existing Bupa code libraries, patterns and architectural techniques.

Familiarity with Agile development methodologies.

Experience in Mocking Frameworks and DI using design patterns, hence comfortable with ambiguity and can push forward with unproven ideas.

A positive and supportive individual with a can-do attitude and the ability to see the bigger picture.
