Company: Green Light

Location: Australia

Category: computer-and-mathematical

**Contract**

**Perth roles**

**Government**

## **About the company:**

Green Light is one of Australia's most successful and fastest-growing IT services businesses. We offer a wide range of IT services in Security, infrastructure, and Systems Integration to a diverse customer base throughout Australia, New Zealand, SE Asia, and Europe.

## **About the engagement:**

**Green Light are looking for an BA/ PM / Change Manager join our client supporting government projects.**

We are open to options to appropriately resource the scope of works. An assumed composition

could include something like the resources below, including high level role details:

ICT Project Management

ICT Business Analyst (BA)

Change Management

Specified Personnel require:

A minimum of 5 years of experience managing ICT and business projects to deliver agreed outcomes and intended benefits within defined timeframes and budget.

Deep expertise and knowledge of project management and change management standards, frameworks, best practice, methodologies, principles, and processes (as relevant to the role). A working knowledge of PMBOK and ADKAR or relevant professional industry certification (i.e., Prince2 Practitioner, Change M

**Experience in current information and communications technologies and initiatives, with the ability to incorporate them within solutions to improve effectiveness and efficiency**

### **Scope of work**

Develop and deliver Tools Review (Software Register and Management Process) using a prescribed framework and project management methodologies.

Identify, manage, and assist with reporting on the delivery of anticipated benefits.

Implement change and integration management plans.

Manage stakeholder requirements and interdependencies.

Undertake project impact analysis.

Engage and consult business stakeholders to understand functional needs versus actual use of tools to validate the current software register against business needs.

Analyse and provide an approach for the business to rationalise tools, accommodating the

functional requirements identified by majority of the business.

Consult key business areas to develop an approach to Software Management.

Develop recommendations and identify tool rationalisation opportunities in agreement with the business. Run through the Software consolidation or decommissioning process on high value selected initiatives with the view to hand over repeatable processes to business-as-usual support teams.

Develop and deliver a Software Register and make recommendations on discovery tools that may assist with software management and create efficiencies.

Review, validate or create software management process documentation, including models, tools, and techniques.
