We know job hunting can be a little time consuming and you're probably keen to find out what's on offer, so we'llget straight to the point.Where and how you can workOur flagship campus is in Sydney. We also have a campus in Melbourne and co-working spaces in Brisbane , Perth and Adelaide. But you have choice in where and how you work. That means if you want to do your thing in the office (if you're near one), at home or a bit of both, it's up to you.What you'd be doing in this roleAs Canva scales change continues to be part of our DNA. But we like to think that's all partof the fun. So this will give you theflavourof the type of things you'll be working on when you start, but this will likely evolve. At the moment, this role is focused on: Apply software engineering practices to provide clean data sets from thedata warehouseto end users.Work primarily with SQL and Python to   automateand optimize data loading and transformation systems.Maintain, operate, and tune data infrastructure (Fivetran, Snowflake, Redshift, dbt, Looker, Mode Analytics, Census) at scale.Develop infrastructure, tools and scalabledata ingestion , access and modeling frameworks to support Canva's use of the data warehouse.Design and buildout analytic data models that support answering questions from our product team and company

leaders.Ensure that our users' data is protected throughout the data lifecycle and that it's used with their consent to provide them with an amazing product experience.Original jobs : https://au.mustakbil.com/jobs/job/1192535 Stores Learn Original World Cup Software Engineer Adelaide AutomateBrisbane Building Design Stores Learn Original World Cup Software EngineerAdelaide Automate
