Application Architect (Australia)

Apply Now

Company: VelocityEHS

Location: Perth

Category: other-general

Open to remote candidates that reside anywhere in Australia At VelocityEHS we are seeking an Application Architect to support the growth of the R&D organization. We are looking for passionate and enthusiastic people who love solving complex business problems. You will be part of a growing architecture and development team, developing the next generation products and setting the standards used throughout the organization. This position will be working closely with enterprise architects, application developers, database developers, QA, Business Analysts, product owners, and the DevOps team.

As an Application Architect at VelocityEHS, you will have the ability to showcase your passion for architecture while delivering innovative products. Combined with mentoring the development teams. While working with a diverse network of technologists, you will participate in the creation and presentation of technical designs as well as help to set the architectural direction for the company's many development teams. Your ability to think strategically while developing high-performing, microservices and working with the enterprise architecture team will help take your career to the next level.

PRIMARY DUTIES AND RESPONSIBILITIES Key Responsibilities include but are not limited to: Deliver complex solutions utilizing Event Driven Architecture and distributed microservicesLead teams through planning activities to break the product vision into discrete blocks of work for implementationSolve complex problems with maintainable and extensible solutionsEstablish, own, and deliver microservice-architecture-based solutionsDesign, propose, and lead the implementation of upgrades for existing applications to achieve a standardized architecture across the enterpriseMentor the development teams through
