Bioinformatician -Galaxy Outreach Specialist Job no: 0062193

Location: Parkville

Role type: Full-time

Faculty: Faculty of Medicine, Dentistry and Health Sciences

Department/ School: Melbourne Bioinformatics

Salary: Level B - $ $114,645 - $136,136 p.a. p.a. plus 17% super

Support life science researchers in utilising digital tools and infrastructure. Collaboration on national and international digital research infrastructure projects with a team of expert bioinformaticians Salary packaging, subsidised health and wellbeing services, fitness and cultural clubs, Myki discounts, and a 25% discount on graduate courses to our staff and their immediate families! About the Role The role at Melbourne Bioinformatics focuses on supporting life science researchers in utilising Galaxy Australia within the Parkville Precinct. This involves developing and delivering training materials, publicizing Galaxy Australia, collaborating with researchers to develop workflows, and contributing to building the Galaxy Australia toolshed. The incumbent will work closely with Precinct stakeholders, national colleagues, and the broader Galaxy community to ensure effective utilisation of digital infrastructure and to facilitate research advancements in the life sciences.

Your responsibilities will include:

Develop a thorough understanding of significant software development and deployment projects and methodologies in support of Galaxy Australia. Contribute to building the Galaxy Australia Tool Shed. Engage with key stakeholders from associated research teams across

universities, research institutes and hospitals. Engage with key stakeholders from associated computational infrastructure providers Who We Are Looking For You will excel in this role if you are personable and enjoy engaging with people, particularly in teaching and passing on knowledge. Your outstanding communication and interpersonal skills, along with your ability to build and maintain relationships with various stakeholders, will enable successful collaboration and engagement both internally and externally.

You will also have:

PhD in a relevant discipline or equivalent experience. Extensive experience as a practising bioinformatician, including significant experience with method and tool development, and data analyses Extensive experience in training documentation and teaching in a complex informatics environment such as a research institute, clinical setting, or a research support facility, working on major research and/or clinical projects. Demonstrated ability to develop clear, accurate and useful administrator, developer and user and training documentation and to be able to interact with and provide advice to users. A commitment to develop, produce and implement documentation which adheres to principles of Human Centred Design for Research as implemented by the University of Melbourne's Research Gateway. For further information regarding responsibilities and requirements, please refer to the attached PD.

Please note: Visa sponsorship is not available for this position . This role requires current valid work rights for Australia.

Your New Team - Melbourne Bioinformatics Melbourne Bioinformatics, nestled within the vibrant hub of Australia's life sciences, empowers researchers with cutting-edge tools and expertise. From software development to bioinformatics training, it accelerates scientific discovery and fosters collaboration. Since its inception, Melbourne Bioinformatics has propelled Victoria to the forefront of life sciences, generating impactful insights that benefit health, agriculture, and engineering, enriching both academia and industry alike.

What We Offer You!

In addition, we offer the opportunity to be part of a vibrant community and enjoy a range of benefits, including generous leave provisions, salary packaging, health and well-being services and discounts on graduate courses. For more information, check out our benefits page!
