

Biology, Biomedical & Chemistry - Achieve Group

[Apply Now](#)

Company: Achieve Group

Location: Australia

Category: architecture-and-engineering

PO3 Scientist role requirements and expectations are:

As our Scientist, you will work within plant biosecurity to achieve plant pest and disease surveillance outcomes.

With direct guidance and supervision, you will:

use your research and analytical skills to perform scientific/ technical literature reviews and write concise scientific reports, papers and recommendations for review by more experienced staff;

collate information and contribute advice to support policy and strategic decision-making and provide scientifically-supported guidance to external stakeholders.

Positively and effectively collaborate with other scientists (e.g. other sub-programs, government departments, external research institutes) to actively resolve problems, address scientific challenges and deliver innovative scientific solutions to strategically manage biosecurity risks. This work may include:

prioritising pests for further analysis

assisting in pest risk and pathway analysis

contributing to ongoing improvement, validation and currency of scientific practices within plant biosecurity surveillance

developing, optimising and validating analytical methods to address emerging needs

and/or

providing initial review and oversight of work outputs.

Where relevant, directly liaise with external stakeholders, establishing and maintaining effective working relationships to achieve project tasks. This may include advising producers/industry stakeholders about routine issues (e.g. findings relating to endemic diseases/pests) and attending local and state forums/committees/community events to facilitate effective biosecurity risk assessment and management.

Present research at state/ national conferences with direct supervision and input from a senior scientist.

Mandatory requirements

A current 'C' class drivers' licence. You may be required to travel within Queensland or interstate for work purposes.

An Australian Bachelor degree (AQF level 7 or equivalent) or higher in biological or agricultural sciences from a recognised tertiary institution.

For international qualifications, the applicant will need their qualification assessed, to determine comparability with the Australian Qualifications Framework. The Department of Employment, Small Business and Training can assist with these assessments for Queensland residents.

Highly desirable requirements

Nil.

Term of Engagement

The term of contract engagement the department is currently seeking is up to 30 June 2025.

If you require further information pertaining to the role please contact the supervisor, otherwise all other inquiries should be directed to the Contact Officer on this Request for Quote.
