Company: Design and Build Recruitment

Location: Australia

Category: other-general

Job Description

The Role:

The role will involve both modification and installation of a building structure, modification and installation of pharmaceutical process equipment, commissioning of the facility and handover to operations/manufacturing of pharmaceutical product. The project is currently progressing through study stage gates with design. Cost management within building and process engineering is essential.

Responsibilities Include:

Provide strong focus on cost trending and forecasting

Establish and monitor project baseline budgets & cost accounts

Monitor and report on cost actuals vs budget

Produce regular cost reports and at time present to the stakeholders

Maintain risk registers to include change impacts

Liaison with financial team concerning financial data required for the project

Prepare cost reports for Stage Gate Reviews

Develop, analyse, and review costs estimates

Strictly adhere to safety and environmental systems and standards

Compliance to project control standards and corporate governance

The successful candidate will have:

Demonstrated experience with cost management tools (excel, SAP, Power Bi, SharePoint)

Strong construction experience

Proficient skills across the MS Suite and other programs for cost reporting

Highly developed communication, negotiation and influencing skills

Be self-motivated, proactive, and flexible regarding types of projects and responsibilities

Demonstrate exceptional time management skills specifically relating to multiple stakeholder management.

Demonstrate ability to work in a team environment – to accept and delegate work as required which is a critical in a consulting environment.

Benefits of this role:

Work with a world class business on high profile projects.

Excellent long-term contract opportunity with potential to extend for the right candidate.

Work within a highly skilled team.

Excellent remuneration.
