Location: South Australia

Category: other-general

Data Engineers are in high demand, so an Internship in this particular stream of data science is a terrific way to start your career. Through this Data Engineer Internship, you will learn a wide range of skills in data extraction, manipulation, artificial intelligence, and database development to help you pursue a career in Data Engineering. As a Data Engineer Intern, you will be part of a high-performing data science team. You will have the opportunity to implement machine learning and deep learning technologies as well as use Python for data cleaning, wrangling and visualisation projects. Start your career as a Data Engineer with the Data Engineer graduate internship program. Data Engineer Internship Responsibilities Manage and analyse data to find trends for decision making Perform data acquisition from large-complex data sources using Python Support the Senior Data Engineer through different data extraction techniques Developing database schemas Work with Data Scientists to collect and analyse large data sets Work across multiple databases as a Data Engineering Intern What you will learn in your Data Engineer Internship? Develop your skills using OLTP databases, OLAP databases and ORMs and NoSQL databases Gain hands-on experience using extract-load data pipelines Experience using cloud platforms, DevOps, micro-services, and serverless architectures (ideally AWS) and deployments How to apply for the Data Engineer Internship? To be considered for this Data Engineering Internship, you need to be a member of the CSA Internship Academy. To learn more about doing an Internship and to book a free Career Counselling and Internships phone consultation , click the button below. Career Training, Mentoring & Internship Program Management fees apply to become a member of the CSA Internship Academy. #J-18808-Ljbffr
