Data ScientistImmutable Web3 201-500 Sydney NSW, Australia Apply Now About the jobOverview:We are now hiring a Data Scientist to support Immutable's design, development and marketing teams to ensure our platform and studio use data to make data-driven decisions. You will do this through quantitative investigation of user interactions, understanding the success of different features and making recommendations.You'll Be Empowered To ????Ensure data-driven decisions are made across the Product, Engineering, Design, and Marketing teams by providing valuable insights and analysis.Conduct quantitative research and analysis of user interactions, identifying patterns and trends that can inform strategic decisions and improve the platform and studioAssess the success of different features, measuring their effectiveness, and providing recommendations on optimising them to enhance the user experience and achieve business objectivesDevelop and implement predictive models to forecast user behaviour, inform product development, and drive targeted marketing effortsCreate visualisations and generate reports that effectively communicate insights and findings to stakeholders, helping inform decision-making across the organisationHave close collaboration with various teams, including Product, Engineering, Design, and Marketing, to ensure that data analysis and recommendations align with the overall business strategy and objectivesWe'd Love You To Bring ????Advanced SQL skillsProven track record in data science or closely related roles, with at

least 2-4 years of experience working on data-driven projects, preferably in a product, platform, or marketing-led company

Proficiency in data analysis, modelling, and visualisation.

Ability to apply statistical techniques, interpret complex data sets, and create clear and compelling data visualisations to communicate insights effectively

Strong stakeholder management skills

Interest in emerging technologies

**Bonus Points For**

- Experience using Looker as a data visualisation and business intelligence tool to create custom reports and dashboards for stakeholders
- Knowledge of behavioural psychology principles
- Familiarity with monetisation strategies and design principles
- Experience with machine learning techniques and algorithms to develop predictive models and gain insights from complex data sets
- Experience designing and implementing A/B tests to evaluate the impact of different features, designs, or strategies on user behaviour and business outcomes

**A Bit About The Team**

This role will be part of the Immutable group data function. This team is responsible for sharing knowledge, monitoring performance and progress of products, identifying valuable insights, facilitating collaboration across global teams, promoting best practices, and democratising data by empowering people to use it.

We are proud of the benefits that we offer for all of our employees globally. Here is a snapshot:

**Attracting The Best Global Talent**

- We commit to paying globally competitive salaries and contributions & we share our products' success through Employee Stock Options. We also support our US Employees with Medical and 401K Insurance
