

Developer Programmer

[Apply Now](#)

Company: Careerone Partner Network

Location: Hobart

Category: computer-and-mathematical

At the company we're dedicated to making exceptional creative tools by combining beautiful user experiences with high performance engineering. Used by millions around the globe, Procreate is committed to placing more power in the hands of creatives.

Now we're looking for a Developer Programmer to join our Product development team in Hobart, you will primarily focus on coding, testing, and maintaining software applications.

What you'll do

- Develop, test, and maintain software code to meet project requirements, with a focus on implementing specific functionalities efficiently

- Contribute to software development tasks, prioritizing the creation of efficient and maintainable code to fulfill project needs

- Improve existing software applications by employing effective coding practices to enhance and extend their functionality

- Engage in code reviews to enhance coding standards and overall code quality, actively providing constructive feedback

- Participate in architectural discussions and decisions, emphasizing the coding and implementation of specific functionalities in the software architecture

- Drive the continuous improvement of development processes, emphasizing efficient and effective coding and implementation of targeted software functionalities

Learn and implement best practices in software development and coding standards, ensuring their application to specific software functionalities

Skills

Bachelor's degree in Computer Science, Engineering, or related field; or equivalent practical experience

Understanding of software development methodologies and best practices

Proficiency in programming languages such as C, C++, or other relevant languages

A passion for staying updated with the latest industry trends and technologies, demonstrating a proactive approach to integrating new tools and frameworks into projects

Excellent communication skills and the ability to articulate technical concepts effectively
