Company: Paxus

Location: Melbourne

Category: computer-and-mathematical

6 Months Contract Opportunity with likely extensions - Melbourne based!

Our client is a leading Global Consulting firm, looking for a DevOps Technical Architect for one of their Melbourne based projects.

Responsibilities include:

Collaborate with product owners and stakeholders to understand business objectives and define a DevOps strategy.

Design and document DevOps practices, including CI/CD, and infrastructure automation.

Working with Product Owners to develop and present a roadmap with current and medium-term development plans.

Design and architect end-to-end Azure DevOps solutions that leverage Azure DevOps tools and services, including CI CD pipelines, scale sets, source control, build automation, release management, and monitoring.

Create architectural diagrams, solution blueprints, and documentation to effectively communicate the proposed technical solutions.

Define enterprise architecture strategy of GitHub.

Skills Required:

Strong expertise in designing and implementing DevOps practices and solutions, including

CI/CD, and infrastructure automation.

Strong experience in Technical Architecture including communication flows, security and new features with respect to COTS and SAAS based products.

Strong understanding of security principles and best practices related to DevOps and Azure DevOps.

Proficiency in various DevOps tools and technologies, such as Git, Jenkins, Docker, Ansible, and Terraform.

In-depth knowledge of cloud computing platforms and services (e.g., Azure, GCP).
