

Electrical Engineer

[Apply Now](#)

Company: DRD Group

Location: Perth

Category: architecture-and-engineering

We are seeking an experienced **Electrical Engineer** to deliver power system modelling works on major Power Systems projects.

Owners team position. Perth CBD based, 8-month contract, Monday to Friday, 45 hours per week.

You will be responsible for working across various packages and ensuring that power system modelling works are delivered to scope, optimum performance, schedule and cost. You will work with other teams to deliver required power system outputs to the requirements of all stakeholders. You will also develop, tune, validate and verify models in DigSILENT and PSCAD as well as prepare appropriate reports to document the studies.

Your Responsibilities:

- Performing detailed power system analysis of generation, transmission and distribution networks

- Specifying and providing technical input to selection of electrical equipment and schemes

- Establishment and continued updating of technical documents

- Integration of vendor models and field data into a fully functional system model

- Design and documentation for power system modelling

Validation of power system models

Your Experience:

Bachelor's degree in Electrical Engineering

Power system modelling experience

Experience in the use of DigSILENT

Good understanding of power system fundamentals

Strong scripting and coding skills

Flexibility in working on multiple tasks and managing the workload, demonstrating well developed time management skills

FULL AUSTRALIAN WORKING RIGHTS ONLY

If you possess the relevant experience and are available for a new opportunity, please submit your resume by clicking APPLY.

DRD Group is a specialist recruitment provider renowned for recruiting quality project teams on major projects within the Energy, Resources, Defence, Renewables and Infrastructure sectors.
