Electronics Engineer

Sydney

Salary range \$80k - \$110k dependent on experience

Permanent, full time

Fast-growing, innovative, technology-led design and manufacturer, based in Sydney is looking for an Electronics Engineer to join their growing team, working on the development of cutting-edge technologies for the domestic and professional consumer markets. This is a unique opportunity to work for one of the most exciting and forward-thinking companies in Australia.

About the Company

An impressive international brand that's sold in numerous countries. With 50+ years' experience, this company are leaders in their field, consistently delivering first class products to a diverse consumer base. Their culture is collaborative, with a genuine team ethos.

Professional and multi-disciplined teams focus on delivering the best, state-of-the-art solutions as they continually strive to enhance the experience of the end user.

The Role

The Electronics Engineer - Sustaining Engineering is responsible for providing day to day support to production with automated assembly and test equipment and device test systems to allow manufacturing targets to be met. The successful candidate will also investigate and perform root cause analysis of all manufacturing test failures. The Electronics Engineer will be responsible for developing, debugging, supporting, and validating electronic test systems from the SMT line to end-of-line functional test of the product.

Perform root cause analysis on production failures (electronics and audio-related failures)
Support the hardware development and testing of new and existing production test systems
Prepare validation reports for new firmware, new products and production failures
Assist and support production and product design teams with test and product validation
Perform technical reviews of electronics design, firmware, software, and equipment documentation
Collaborate with the design team to ensure new products are testable, manufacturable and meet technical specifications
Conduct continuous improvement on current processes or test equipment for higher efficiency or quality output

Skills and Experience

Bachelor's degree in electrical engineering or related technical field
Ability to read and understand electronics schematics and manufacturing test instructions
Experience with E-Cad (Altium preferable)
Experience with firmware coding (C/C++) Python is a bonus
Familiar with electronics design and solving of electronic failures
Experience in using Microsoft 365 Office suite or similar
Ability to work well in a group by sharing ideas and providing solutions
Good organisational skills, time management, prioritisation of tasks and attention to detail
Good communication skills and documentation

Benefits

You will work with the finest technologies in metal engineering and production in a cutting-edge facility where the team enjoy a culture of collaboration, best-practise and innovation
Work with passionate, hardworking, and talented colleagues who thrive in challenging situations
Onsite gym and wellbeing program
Onsite parking
Free employee assistance program, available 24/7
Company values diversity in the workplace and encourages applications from of all genders, ages and backgrounds

N.B. You must hold full and ongoing rights to work in Australia to be eligible for this role.#J-18808-Ljbffr
