Permanent staff position at George Fisher Mine Mount Isa, Queensland, Australia Job ID37801 Closing date08/04/2024 Last Updated04/04/2024 Engineer - Geotechnical George Fisher Mine, Technical Services Mount Isa, Queensland, Australia Reference No: 37801

Glencore is one of the world's largest globally diversified natural resource companies and a major producer and marketer of more than 90 commodities. Our operations comprise around 150 mining and metallurgical sites, oil production assets, and agricultural facilities – supported by a network of more than 90 offices located in over 50 countries. Mount Isa is a thriving city acting as a hub for regional business, transport, services and government in Northwest Queensland. George Fisher Mines attracts the best people from all over Australia and the world who are drawn to working for a high-calibre mining operation with the added benefit of a comfortable residential-based work believe in the value of our people and our approach fosters the highest level of professionalism, ownership and entrepreneurial spirit in all our people while never compromising on their safety and well-being. Learn more about Mount Isa Mines at .Our people enjoy a thriving town of 23,000 people with restaurants, movies, gyms and sporting activities, golf course, as well as fishing and camping activities at the Role

An exciting opportunity exists for a Geotechnical Engineer to work closely with leaders and key stakeholders in the Technical Services team, Development department and wider George Fisher Mine team. Reporting to the Superintendent Geotechnical, you will be working closely with diverse stakeholders, across multiple sites as a conduit between strategy and execution. As one of the world's largest Mining Operations and Australia's deepest, this is a challenging position technically. However, with a team of experienced peers and a

strong technical leadership team you will be well supported and developed. Your key responsibilities include:

- Ensure compliance is maintained to the Ground Control Management plan and QLD mining quarrying and Safety ACT.
- Conduct and report Empirical and Numerical modelling of new mining blocks.
- Record and interrogate on monitoring instrumentation, report and develop action plans in conjunction with operations and planning engineers.
- Interpretation of mine monitoring systems; e.g. Seismic monitoring
- Underground inspection and Geotechnical mapping
- Design and reconciliation of large stoping excavations
- QAQC on installed ground support
- Monitoring of excavations through damage mapping
- Design and reconciliation of vertical and horizontal mine development.

As the successful applicant you will have:

- A tertiary degree or an equivalent qualification in Engineering or a Geoscience, with majors in Mining and or Geotechnical engineering.
- Approximately 2 years' experience (or more) in underground hard rock mining.
- experience with numerical modelling software packages (ideally Map3D)
- experience with Mine design software (Ideally Deswik Suite)
- Teamwork, strong communication skills, effective problem solving skills, analytical skills.
- High level of accuracy in their work and ability to manage time effectively.
- Competent in using Deswik, Geotechnical software packages, and exposure to Geostatistics.
- Australian Manual Drivers' Licence or international equivalent

Benefits:

- Competitive Remuneration packaged with 13% superannuation.
- Paid relocation inclusive of three-months furnished transit accommodation.
- Benefits program including discounts with Health Insurance providers, online and in-store discounts through
- Glencore Rewards, salary sacrificing vehicles, Employee Referral Program and Recognition and Reward programs.
- Fantastic professional development opportunities with Professional External Education Assistance, leadership development programs, ambassador Programs and more; and unrivalled career opportunities.
