

Enterprise Architect

[Apply Now](#)

Company: Randstad

Location: Australia

Category: computer-and-mathematical

Randstad Data is currently on the hunt for a fantastic Data Architect to join a large organisation with a household name. Working in a team of Enterprise Architects, you will play a key role in architecting and implementing solutions that power our data-driven initiatives with the initial project enhancing the Data & Analytics platform.

Responsibilities:

Take ownership of the Data Platform architecture, guiding and directing vendors to ensure alignment with our strategic objectives. Proactively identify and rectify any issues arising from vendor performance, ensuring resilience and efficiency.

Collaborate with cross-functional teams to design and implement scalable, robust solutions leveraging Azure data services, Data bricks, and Azure integration. Utilise your expertise in Microsoft technologies to drive innovation and excellence across our data landscape.

Lead the charge in enhancing our data analytics capabilities, leveraging real-time data to drive actionable insights and business value.

Serve as a trusted advisor to senior leadership, providing strategic guidance on data architecture, technology trends, and best practices.

Necessary Skills:

Extensive experience in enterprise architecture, with a focus on data platform solutions.

Proven track record of successfully architecting and implementing data platforms in a Microsoft environment, utilising Azure data services, Data bricks, and Azure integration.

Strong leadership skills, with the ability to effectively collaborate with cross-functional teams and guide vendors to deliver optimal results.

Resilience and adaptability in challenging environments, with a proactive approach to problem-solving.

Excellent communication and stakeholder management skills, with the ability to translate technical concepts into business value.
