Category: computer-and-mathematical

FMW Developer

Contract:12 months

Extension: 12 months

Location:ACT

Clearance: Minimum Baseline

Duties:

Develop and deploy SOAP and REST services using Oracle Fusion Middleware products, such as Oracle Service Bus and SOA Suite components.

Utilise WSDL, WADL, Swagger for service description and consumption, and perform transformations using XSLT and XQuery.

Collaborate with Business Analysts to understand and translate business requirements into service specifications, including composition, logic, rules, and error handling.

Generate and manage technical documentation including mapping documents, service contracts, and unit test cases.

Contribute to the development and support of products like Axway API Gateway, Axway API Manager, and Axway API Portal.

Required Skills:

Skilled in developing and supporting FMW products like Oracle Service Bus (OSB)

and BPEL.

Proficient in constructing SOAP and REST web services adhering to diverse integration patterns using industry best practices.

Demonstrated expertise in tackling intricate integration technical hurdles in project settings.

Capable of generating meticulous technical solution documentation of high quality.

Proficient in crafting thorough unit test specifications based on functional and technical designs.

Experienced in defining service contracts encompassing message definitions, business rules, and non-functional requirements.

Collaborative approach to working with Business Analysts to grasp and translate business needs into service specifications, including composition, logic, rules, error handling policies, and messages.

Please note due to the nature of work, only AUSTRALIAN CITIZEN with a BASELINE are considered for this position.
