

Front-end Developer

[Apply Now](#)

Company: Switch

Location: Sydney

Category: computer-and-mathematical

About the Role

It's an exciting time at Switch with significant growth in our team and new business, so we're looking for a Senior Front-end Developer to deliver excellence for our customers.

We're looking for someone who can lead the front-end development within a project team and is comfortable working in close collaboration with customers.

As an effective collaborator you will be able to contribute directly on projects in a quick and efficient manner, as well as working with less experienced members of your team to help increase both their quality and velocity.

With a keen eye, attention to detail and creative flair you are able to develop elegant solutions that bring life to designer's visions.

Experience

We are looking for a developer with a minimum of **5 years experience** and who have experience in:

Working in an agency environment with enterprise CMS

Large, complex projects with multiple integrations

Software design principles

Agile working practices

Identifying potential risks and issues and communicating effectively to the wider project team

Working closely with engineering and design teams utilising UX, UI principles and best

practices

Mentoring and providing guidance to less experienced members of the team

Devops tools experience (Git, Jira, Bitbucket, Confluence)

Developing Progressive Web Apps, Service works and AMP

Leading the front-end project setup, design and ongoing maintenance of solutions.

Skills

We're looking for the following skills and experience:

Master of HTML & CSS and Javascript ES6 across cross-browser/device

Expert integrating with API endpoints

Expert using a modern Javascript Framework such as VueJS

Expert at writing performant, scalable and reusable UI components

Proficient building on a headless CMS

Proficient using NodeJS to create task-runners, build tools and bundlers (webpack) and package management (NPM)

Expert with version control systems (namely Git)

Power user of Visual Studio Code or a similar IDE and the browsers built-in development tools

Expert knowledge and application of front-end performance optimisation techniques

Expert at planning and estimating front-end development work accurately

Proficient at writing technical documentation

Proficient developing for WCAG AA standards or higher

Proficient at implementing SEO standards; including url structure, redirects, sitemaps, semantic markup, structured data, metadata etc

Proficient at implementing custom GA/GTM events to defined specifications

Nice To Haves

Not absolutely essential to the position, but it would be great if you had knowledge or exposure to:

Javascript object oriented programming

Strong understanding of TypeScript

Familiar with SCRUM / Agile methodologies

Even if you're not expert at everything listed above, you should be interested in expanding your skills, learning from your peers and from your own practice. You listen to feedback, you pursue improvement and you give yourself room to feel satisfied with what you've accomplished.

Soft Skills

Meticulous attention to detail, in both the technical and visual aspects of the role.

Critical thinking, strong analytical skills and an ability to think logically with excellent problem solving skills.

Great oral and written communication skills.

You're able to follow procedures and standards, but also be confident with introducing new ideas wherever you think improvements can be made
