Company: Enlab Software

Location: Australia

Category: other-general

At Enlab Software, we are revolutionizing the way people do business and increase overall productivity and efficiency via delivering smart enterprise solutions. We provide Agile Offshore Software Development for enterprises across the world following US led standards. On the way to contributing to the customer's success, our employees become mature in their careers and find a purposeful and meaningful life. Our Values: Excellence: Never settle for good enough, because good enough never is. Progress: Always be learning, improving, and looking for ways to bring about growth. Integrity: Keep reputation in mind first and last in every action, interaction, and decision. Collaboration: Connect, communicate and understand to bring out the best in our team. With a team of 50+ talented individuals, we are dedicated to delivering cutting-edge solutions to our global clients. Embracing change is an integral part of our DNA, and we firmly believe that it adds excitement and growth to our journey. The job description will give you the flavor of the type of things you'll be working on when you start, but this will likely evolve. What You'll Do As a Full-stack Developer, you will be an integral part of our innovative development team, responsible for designing, developing, and maintaining both the front-end and back-end components of our web applications. From concept to deployment, you will play a crucial role in creating robust, scalable, and user-centric solutions that meet the needs of our clients and end-users. You will liaise with different teams/clients to provide the best solutions for product requirements and designs. You will collaborate with the team and work directly with clients to develop and provide high-quality work products. When you are not coding, you will participate in reviewing other members' code or researching new products and technologies. You will get hands-on experience in delivering

training, motivating your teammates to go beyond their potential, or perhaps persuading people who do not agree with you. Last but not least, you will be trained and work with some latest and hot technologies/architectures such as Micro-services, Azure, AWS cloud services, Angular, ReactJS, and Flutter. Our best engineers are passionate about programming - they even dream about it. If you can code in your sleep too, you'll be in good company. What You Come with A degree in computer science, engineering, or equivalent experience. From 2 years experience in software/web application development using C#, .NET Core. Experience with, or at least familiar with MongoDB. Experience working with 3rd party integrations. Experience with Microservices architecture design. Nice to have experience with AWS Cloud services. Experience in Front-end design and development using Angular framework. Have good knowledge and experience with Agile/SCRUM development methods. Ability to communicate with clients in English, speaking is a plus. Passionate about programming and solving complex technical problems. A team player and an independent underground leader who is fearless to voice. Here's a Taste of What's on the Offer

Competitive income packages and comprehensive benefits that are designed to meet your financial needs and provide stability for you. 13th salary fixed and OT compensation. All benefits by Vietnam's Labor Law with full salary for social insurance and quality annual health check. Project performance bonus quarterly. Year-end performance awards. Holiday present and bonus. 1 - 2 performance review annually. The opportunity to build meaningful products for international clients such as the US, Australia, European countries that have real-world impact and leverage your expertise. Flexible working hours - in the end, only the result that matters. A supportive work culture that our leadership team is accessible, supportive, and invested in your success. Provide a multitude of learning opportunities, such as training, mentoring, peer-to-peer program, and e-learning platforms such as Coursera Plus, Cloud Academy, Pluralsight; or requested courses/certificates based on demand. Support initiatives that promote employee well-being such as Enlab's club: badminton, football, book, English; Meditation room, massage chair; Happy Friday with F&B; Team building 2N1D, Outing trip: 3N2D... Enlab is an equal opportunity employer, dedicated to diversity, equality, and inclusion, and provides equal employment opportunities to all employees and applicants for employment.
