Top 10 ASX c**Senior Azure Cloud Engineer or Azure DevOps Engineer** - APPLY NOW

Preference for Cloud design, Terraform and DevOps knowledge.

Azure Greenfield Project

Melbourne / **VIC Adelaide** / **SA** /**Perth**emote working available

Contract/ **Perm available** -dependent on experience - daily rate

This is a growing Azure Cloud team where they are building a new squad with multiple roles. Although this role is Cloud focused, they have a high preference for Cloud platform set-up and Cloud DevOps. This is a greenfield project.

This exciting new role is within the Cloud Engineering function exists to execute on the Cloud Strategy and manage the ongoing financial, operational and security aspects that arise as a result. From a strategic outcome's perspective, the Cloud Engineering Team aims to maximise the benefit of cloud migrations, support the SaaS adoptions for speed to market and deliver PaaS and IaaS solutions in line with our risk profile.

The Cloud Engineering Team is business critical and provides the entry point for Company Line-of-Business Teams. Working in the Cloud Engineering Team, you will work collaboratively with Operational stakeholders, Data teams, Cloud & Security Engineers and

Business Analysts, with your primary responsibility focussed on Cloud Hardening & Reporting. You will have a passion for developing and building Cloud Native Solutions. As a Cloud Engineer, you will require proficiency in technology, design, security, and hands-on coding skills.

Ideal skills: (not essential)

- Cloud IT solution implementation experience

- Understanding of Cloud platform risk, security and splunk

- Experience set-up Azure Security, IAM, landing zones and Security Access in a greenfield environment

- Experience with Senitiel, Synk, Splunk, Defender or similar tools

- Experience woking in a serverless and logicapps environemrnt

- Experience creating and managing PaaS and IaaS services in Azure using Terraform and Infrastructure as code.

- Demonstrated experience with DevOps tools such as Jira, Azure DevOps

- Excellent understanding of networking, identity, and security practices in the cloud.

- Strong hands-on expertise with 'Infrastructure as Code' and 'Configuration as Code', e.g YAML, JSON

- Strong hands-on expertise with source control, e.g. GitLab, GitHub, etc.

- Strong hands-on automation and orchestration tools and CI/CD pipelines, e.g. Azure DevOps, Ansible Tower, HashiCorpPacker, Terraform Enterprise, JFrog Artifactory, etc.

- Excellent grip on secret management tools, e.g. Azure KeyVault, Hashicorp Vault, etc

- Strong analytical, statistical and troubleshooting capabilities.

- Ability to manage multiple, concurrent tasks, which have competing demands

Please APPLY by sending your CV for an immediate interview. I am currently recruiting for several Perm & Contract Cloud, DevOp roles.
