

Hardware Engineer Intern

[Apply Now](#)

Company: SANITI - Student Association of Nelson-Marlborough Institute of Technology Inc

Location: Australia

Category: other-general

At IMC, we are performing some of the fastest trades in the world. Key to that performance is our proprietary hardware communicates with it. Penultimate year engineering and compsci studentsAs a business, we continually innovate new solutions to remain competitive in a dynamic financial landscape. If the challenge of using the latest technology to solve problems sounds appealing, then the IMC hardware engineering internship is a great fit for you. Your Core Responsibilities: From day one, you are immersed in real projects, complex problem-solving, and opportunities to learn from our strongest engineers and traders. Develop your knowledge of algorithm complexity, professional design and writing fluent code with our state-of-the-art technology. Learn both hardware and software development skills. Work with cutting-edge FPGA technology. Develop with C++ and SystemVerilog programming languages. Enhance your knowledge of our business model and about high-frequency trading. Build key relationships across our trading and technology teams. Work collaboratively in an environment where creativity, teamwork and innovation are recognised and rewarded. Have the opportunity to secure a full-time role with IMC once you graduate. Your Skills and Experience: An academic background in Electronic Engineering, Computer Engineering, Computer Science, or equivalent. Commenced your penultimate year of study. Proficient experience in SystemVerilog, Verilog or VHDL. Knowledge of C, C++ or Python. Knowledge of logic design. About Us IMC is a leading global market maker with offices in Europe, the US, and Asia-Pacific. We use algorithmic trading and advanced technology to buy and sell securities across multiple trading venues. Our vital role at the center of the financial markets provides liquidity for buyers and sellers worldwide. In the late 1980s, IMC

quickly identified the importance of technology in the fast-evolving trading environment. Our passion for innovation continues to drive us today. Although our company has grown rapidly over recent decades, we still approach our work with the same entrepreneurial spirit, emphasizing continuous improvement and innovation. We like our people to think for themselves, and we give them the responsibility and support they need to make an impact.

You should have or be completing the following to apply for this opportunity. Penultimate year engineering and compsci students Degree or Certificate Minimum Level of Study Bachelor or higher Study Field E Biomedical Engineering Chemical Engineering Civil Engineering & Construction Communications Engineering I Bioinformatics Computer Graphics & Animation Computer Science (all other) Computer Systems and Networks Cyber Security Work rights The opportunity is available to applicants in any of the following categories. country eligibility Australia Australian Permanent Resident Australian Temporary Work Visa Graduate Success Stories Graduate stories My role at IMC is a value-based market-making (VMM) options trader on the Kospi 200 index with a specific focus on broker trading and relationships. My role at IMC is a value-based market-making (VMM) options trader on the Kospi 200 index with a specific focus on broker trading and relationships. IMC invests really heavily in training its people and gives them a lot of responsibility and the power to take ownership over areas that interest them.
