

Instrument & Control Engineer

[Apply Now](#)

Company: TRS Staffing Solutions

Location: Perth

Category: other-general

Our client, Fluor is one of the world's largest publicly traded engineering, procurement, construction (EPC) and maintenance companies, providing innovative EPC services to government and private-sector clients in diverse industries.

Exciting times are ahead in Fluor's Perth office as the company has secured several Major Blue-Chip resources projects with Global Tier 1 clients spanning a variety of commodities, including Iron Ore, Lithium, Copper, Gold, Rare Earths Sands, and Green fuels.

This is a terrific opportunity to get on board with a company that has major long-term projects, so if you are Instrument & Control Engineer that wants to get in on the ground floor as Fluor expands its highly experienced team this is the perfect time.

Principal Job Duties & Responsibilities

Reporting to the IC&E Lead, you will support technical compliance to the BP Engineering Technical Practices for the Kwinana Renewable Fuels Project. Your key responsibilities will include:

Provide expert knowledge to existing new project developments to ensure compliance with Instrument & Control discipline Engineering related to corporate, legislative, and regulatory requirements.

Provide recommendations to the project to balance the technical requirements of the instrumentation & control discipline in a pragmatic and risk-based manner.

Support key project activities (Design review, HAZOP, LOPA, FAT, IFAT, SAT) and management of change (MOC) processes.

Support the multidisciplinary Engineering team with Instrument & Control related queries.

Align and provide direction to Engineering contractors with respect to Instrument & Control discipline technical requirements.

Requirements

Demonstrated experience in an Instrument & Control engineering position within the oil and gas industry.

Good understanding of oil and gas industry technical practices and standards

Experience in key major projects activities (Design Review, HAZOP, LOPA, FAT)

A wealth of knowledge in BMS (Burner Management Systems) and Fire & Gas protection Systems

The ability for collaborative engagement of functional groups and other stakeholders to achieve the project goals.

Benefits to you

Long term projects in a variety of commodities.

Chance to be part of the clean energy transition.

Chance to work with a highly experienced and well-regarded team.

In order to be considered for this position, current Australian legal working rights are required.

N.B. All candidates will be treated with discretion and only relevant candidates progressing to the next stage of the recruitment process will be contacted.

We are an equal opportunity employer that recognises the value of a diverse workforce. All qualified individuals will receive consideration for employment without regard to race, colour, age, sex, sexual orientation, gender identity, religion, national origin, disability, or any other criteria protected by governing law.
