

## Intermediate Software Engineer - South Bank, QLD

[Apply Now](#)

Company: ETS

Location: Australia

Category: computer-and-mathematical

**Ciao, Olá, こんにちは, Bok!**

At **Flight Centre Travel Group (FCTG)** our purpose is to 'open up the world for those who want to see'. Every day, we give people all around the world the opportunity to experience something amazing – travel!

We are looking for an Intermediate Software Engineer to join the Enterprise Technology Services team! In this role you will be responsible for backend design, build, testing and release across multiple streams. This role will have experience with agile software development, working using the appropriate agile methodologies and lean practices. The role will also allow ability to demonstrate practical experience of development, such as agile engineering methods backed by a deep understanding of good software engineering practices.

### **What you'll enjoy...**

Tick destinations off your bucket list with our discounts on travel and accommodation.

Employee Share Scheme through Equate Plus.

Access to in-house financial and health services, internal 24/7 gym and newly renovated end-of-trip facility.

Receive ongoing training and professional development through the Flight Centre Landing.

Global career opportunities in a network of brands and businesses at your fingertips.

Proud Corporate Social Responsibility platform through the Flight Centre Foundation, and

Brighter Futures programs.

Various social events to promote networking, the celebration of wins, and sometimes just for fun! (Global Gathering 2024 - Portugal).

### **A day in the life...**

Design, develop and deploy backend microservices hosted in Azure Cloud (azure functions, container applications, web apps) and APIs primarily using ASP .Net Core, with C#, and .Net.

Craft high quality, secure, testable, maintainable code that is not over engineered.

Own the quality of what we build, through testing, test automation and observability to ensure operational reliability and performance.

Analyse business requirements and problem solve to create the right solutions for our customers.

Participate in code reviews with other engineers to provide feedback to ensure we maintain quality standards, and compliance.

Maintain and improve our documentation across code bases architectures and our knowledge bases.

Collaborate in our cross-functional Product Management and Engineering teams to plan and deliver high quality solutions in a fast-paced, agile environment.

Be an impactful contributor to the team, to plan, design and build elegant solutions.

### **Who you are...**

At least 3 years of professional experience in software development.

Previous experience as a Backend Engineer.

Experience with Azure Cloud services such as Functions, Logic Apps, Container Applications and Data Factories.

Proven experience in building user-friendly, responsive web applications for desktop and mobile.

Experienced with C#, ASP .Net, unit testing, debugging and automation techniques.

Experience in software testing from unit tests.

Experience in building JSON-based RESTful APIs, as well as CRON/ triggered microservices.

### **Desirable...**

Experience with DevOps tooling & practices valuing a DevOps culture.

Experience with observability tools, such as logging (Application Insights) and monitoring.

Passionate about/experienced with open source and developer tools.
