Company: Interpro

Location: Melbourne

Category: other-general

My client is a dynamic and innovative tech company headquartered in Melbourne CBD. The team is comprised of talented individuals who are passionate about leveraging technology to create impactful solutions. They foster a collaborative and inclusive work environment where creativity and innovation thrive. Interpro are seeking a highly skilled Lead Full Stack Engineer with expertise in .NET, Azure and React. The ideal candidate will have a strong background in microservices architecture and extensive experience in managing cross-functional teams. This role offers the opportunity to lead a team of tech professionals. Responsibilities: Lead and mentor a cross-functional team of developers, BAs, and QAs to deliver high-quality software solutions. Collaborate with product managers and stakeholders to understand requirements and translate them into technical solutions. Architect and design scalable and robust microservices-based applications using .NET Azure and React. Drive best practices in software development, including code reviews, automated testing, and continuous integration/continuous delivery (CI/CD). Provide technical guidance and support to team members, fostering a culture of learning and growth. Act as a technical leader, driving innovation and staying abreast of emerging technologies and industry trends. Collaborate with other teams and departments to ensure alignment and integration of solutions. Contribute to the overall technology strategy and roadmap of the organization. Requirements: Extensive experience in software development using .NET Azure and React. Strong full-stack development skills, including proficiency in frontend and backend technologies. Solid understanding of microservices architecture and design patterns. Proven experience in leading and managing cross-functional teams in an agile environment. Excellent

communication and interpersonal skills, with the ability to collaborate effectively with diverse stakeholders. Strong problem-solving and decision-making abilities. Experience working with cloud technologies, preferably Microsoft Azure. Previous experience in a technical or team leadership role is highly desirable. Location and Flexibility: This position is based in Melbourne with full working flexibility. Newly renovated offices in Melbourne CBD offer a vibrant and collaborative work environment.
