

Lead Instrument & Controls Engineer

[Apply Now](#)

Company: Nes Fircroft

Location: Australia

Category: other-general

We are currently recruiting a Lead Instrument & Controls Engineer to join a Global EPC in Perth, Australia as part of its Operations APAC West business.

This is an initial 12 month opportunity which is expected to be an ongoing requirement for a key energy client.

The successful candidate will be reporting directly to the Instrument & Controls Discipline Lead and working across FEED / Execution to EPCM delivery, across some of world's most technically challenging brownfields Oil & Gas projects.

Responsibilities: Acting as focal point for Instrument & Controls

Engineering activities across the project lifecycle (Concept, FEED, detailed design) to produce fit for purpose solutions. Producing cost effective Instrument & Controls Engineering reports, documents and deliverables Supporting and mentoring Instrument & Controls

Engineers and Designers and providing technical assistance as required

Providing technical input to business development, early customer engagement, tenders and studies Acting as a Technical Authority, ensuring technical integrity of all work performed on projects.

Ensuring all assigned work is carried out in compliance with agreed budget and schedule.

Qualifications:

- Ideally, you will be a qualified engineer with an Instrumentation / Electrical Engineering degree from a recognized institution, and have relevant experience in either a Principal or Lead Instrument & Controls Engineer level role, within the Australian Oil & Gas industry within an EPCM / Engineering design office environment.

In addition you will have: Knowledge of SPI for the development of I&C engineering

deliverables, control systems, shutdown PLC hardware and software design Extensive design and knowledge of applicable codes and standards (both international and Australian)

Proven experience managing risk during the design process consistent with technical and commercial requirements Excellent analytical, literacy and numerical skills Excellent

communication skills with proven experience in client facing roles Be prepared to undertake site visits either onshore / offshore What will set you apart will be your in-depth

Instrument knowledge supported by relevant experience in design and operations.

E:

Full AU working rights required

With over 90 years' combined experience, NES Fircroft (NES) is proud to be the world's leading engineering staffing provider spanning the Oil & Gas, Power & Renewables, Chemicals, Construction & Infrastructure, Life Sciences, Mining and Manufacturing sectors worldwide.
