Developers/Programmers (Information & Communication Technology)

Use your frontend and backend development skills to create software solutions and applications for one of the largest iron ore producers in the world

Why this should be your next career move:

You will work with an organisation that has been helping some of the world's largest businesses in their transformation journeys for over 50 years. They believe Innovation and collective knowledge can transform all our futures with greater purpose. You will get to work with the latest technologies that will help accelerate your career. You will get global career progression prospects and be supported to pursue any industry certification. LinkedIn has awarded them as one of the best workplaces to grow your career in Australia.

What you will be responsible for:

You will use your backend development skills to build algorithms and create user friendly functionality. You will do sprint reviews and keep everyone updated on the status. You will identify process improvement to streamline processes, as such adding more value in quality and better utilisation of time. As a lead/senior professional, you will ensure that correct coding standards have been followed.

What you will bring to the role:

Your experience with C#, .Net Core, Entity Framework and API technologies

Your experience with microservice architectures and containerisation(eg: Docker, Kubernetes)

Familiarity with BDD/TDD and Agile development methodologies
