Join our dynamic production team across our fresh milk production cycle at Smeaton Grange as a Machine Operator

Position Description About the role Join our dynamic production team across our fresh milk production cycle at Smeaton Grange as a Machine Operator. Reporting to our Team leader, this role will work across a rotating shift pattern per fortnight 5:00-1:00pm Monday-Saturday then 10:30am-6:30pm Monday to Friday the following week.

Responsibilities Ensuring all raw materials for production are available to enter manufacturing areas. Ensuring production machines are to be set up and ready for use. Able to troubleshoot and rectify any issues – line stoppages etc. Gather data as required by open platform communication sheets and take corrective action. Ensuring work areas are clean, tidy, and clear of potential hazards Actively participate in our CIP (Cleaning In Place) processes, manually cleaning of machines and work areas are to be carried out daily. Be a workplace safety advocate, voicing all identified safety issues.

Skills & Experience You will be an individual with an eye for details currently looking to commence his career and/or seeking a new challenge within food and beverage manufacturing, you will be a reliable team player who presents with confidence, punctuality, and seeks to continually elevate operational quality and safety efficiencies. The following are considered essential skills to be considered for this role: Prior experience within a production environment. FMCG – Food and Beverage experience – advantageous. Prior experience with rotating shifts. Hold a current Forklift License – desirable but not essential. Solid understanding of good manufacturing practices. Safety focused. Ability to work within a team environment. Punctual and reliable. 4 Litres of fresh a2 Milk for each team member weekly Enhanced paid parental leave across all locations (in Australia: 18 weeks

primary carer and 4 weeks secondary carer), with no minimum tenure requirement for accessing paid parental leave Women's health leave -5 days of paid leave each year for members of our team who need to manage the symptoms of perimenopause, menopause, or severe endometriosis Juggle Street- On-demand platform for childcare (and tutoring) in Australia and New Zealand Global wellbeing day – bonus day off each year Remote 'work from anywhere' – up to 2 weeks a year Families@a2 resource portal: webinars, podcasts, online course and connect you with experts Access to our global reward and recognition platform which includes the largest employee discounts program in the world Professional and personal development opportunities via Udemy (global learning platform) Masterclass (online learning platform with classes taught by world experts) Culture Club at each of our locations Team member referral bonus Company paid 'Headspace' subscription for all team members Employee Assistance Program Opportunities to get involved in community and sustainability initiatives Possibility of some flexibility in location (Sydney or Auckland office) for the right candidate.

About The a2 Milk Company Our purpose is to pioneer the future of Dairy for good. The a2 Milk Company, driven by science and a pioneering spirit, disrupted the dairy and infant milk formula industry. At every point The a2 Milk Company rethought how to do dairy. We do this today by pioneering: Science and innovation to make dairy accessible again The ability to rethink every element of the dairy industry Paying the supply chain fairly to maintain trusted and loyal relationships Our vision is to create an A1-free world where dairy nourishes all people and our planet. The a2 Milk Company seeks to achieve this through the naturally occurring a2 Milk difference and by bringing a more sustainable approach to dairy. Conventional cows' milk contains two main types of beta casein protein, A2 protein and A1 protein – our branded milk is different from conventional cows' milk because it comes from cows selected to naturally produce only the A2 protein type and no A1. Consumers and healthcare professionals report that certain people who experience challenges drinking conventional cows' milk may experience benefits when they switch to a2 Milk. The a2 Milk Company has products and trading activities in Australia, New Zealand, Greater China, North America, and a selection of emerging markets. Our 'BOLD' company values are the guiding principles that shape our behaviour, decisions, and interactions. They serve as the compass that steers us in the right direction and unifies us through shared behaviours.
