You're in the right place. We've been a leading design, engineering and advisory company for decades. So why choose Aurecon? It really comes down to one, crucial question: what kind of world do you want to create for the next generation? Truth is, the decisions being made right now will determine the future of everything – from the local community to the sustainability of our clients' businesses – to the entire planet. Infrastructure Advisory is at the front end of decision making and investment shaping with our clients.. If you are a management consultant or infrastructure advisor looking for a more authentic, grounded career step at an established brand with a future focus, Aurecon is the place to do it. Just ask many of our team who have made that leap. How will your ideas contribute to shaping what's next? In this position you will join our Infrastructure Advisory business, where you will play an integral role in the delivery of our investment advisory services to public and private clients, across a range of markets including transport, water, resources, energy and built environment. Diversity of meaningful projects keeps us challenged and inspired. Our teammates are working on renewable energy zone assessments, digital twin strategies, technical due diligence for major telecommunication clients, and investment strategies for future water and defence infrastructure. We aspire to be a trusted partner to our preferred clients, working across the whole infrastructure asset lifecycle, advising on investments and decisions that drive value and proactively respond to disruptive change. Here are the key

things you'll do:

**Investment Analysis:** Conduct comprehensive analysis of potential infrastructure investment opportunities, assessing their viability via business case frameworks, investment logic mapping and feasibility studies.

**Market Research:** Stay up-to-date with industry trends, regulations, and market conditions, identifying potential risks and opportunities for clients and their portfolios.

**Financial Modelling:** Develop sophisticated financial models to evaluate investment scenarios, considering factors such as cash flow, return on investment, and project timelines.

**Due Diligence:** Perform thorough due diligence on prospective infrastructure investments, including reviewing asset management, maintenance approaches and capital expenditure, to identify potential risks and opportunities for growth and optimisation.

**Client Relationship Management:** Build strong relationships with clients, understanding their business and assets, and providing guidance and updates as the markets in which our clients operate evolve. Collaborate with internal teams, to bring together our design, engineering and advisory capabilities in the delivery of seamless client experiences.

**Industry Networking:** Attend industry conferences, seminars, and networking events to expand professional networks, share knowledge, and stay informed about infrastructure investment trends.

How will your future be shaped by us? Joining Aurecon means you'll be at the award-winning edge of innovation and sustainability. AFR ranked us Top 5 among sustainability leaders and Top 3 of all innovative companies in professional services. One Consult awarded us an innovative design award. Plus, we were Consult Australia's large firm of the year. You really can bring your whole self to work and be confident your voice will be heard. We don't just claim we're inclusive and innovative, as proven by the independent awards and accreditations we've gained. We've been recognised for our innovation culture, gender equality and our LGBTI+ inclusion. Plus, we have a robust Reconciliation Action Plan – our fourth edition since 2014. On a personal level you'll have access to flexible work hours, remote work, working holidays, part-time and job share options. When it comes to your development, you'll be a part of our Advisory Development Academy, and have the option to build your technical mastery in the Aurecon Design Academy which earns you a Graduate Certificate in Design Management from the prestigious RMIT University. Plus, you'll be supported on every step of your career journey with mentoring, leadership training and our Career Hub. Outside of work, you'll be further supported with competitive paid parental leave, cultural public holiday swaps, plus wellbeing support programmes.

What are we looking for from you? You'll have a genuine passion for re-imagining problems and continuous learning to help shape the future. We value that each of our team members brings something different to Aurecon.

We look for people who have had a broad range of experiences throughout their career and can demonstrate how they have worked as part of a team to bring ideas to life. Alongside your industry experience in similar management consulting, engineering consulting, or equivalent roles, you'll also have: A Bachelor's degree in business, finance, economics, engineering or a related field. A minimum of 7+ years of experience in areas similar to the work of our infrastructure investment advisory capabilities, primarily due diligence and business case development. In-depth knowledge of infrastructure sectors such as transportation, energy, water, and telecommunication, along with an understanding of regulatory frameworks. Proficiency in financial modelling, and standard financial analysis tools. Strong analytical skills with the ability to interpret complex financial data and make sound strategic and commercial recommendations. Excellent communication and interpersonal skills to build, foster and evolve trusted relationships with clients and internal teams. Familiarity with local and national infrastructure market dynamics. Knowledge of all phases of a project's life cycle and particularly initiation, appraisal and business case stages. Structured and strategic problem solving approach backed by excellent written and verbal communication skills. Ready to bring ideas to life? Then please apply. Remember, it's you and how you bring ideas to life which are important. Your background, unique needs and individuality will be valued.
