

Medical Scientist

[Apply Now](#)

Company: Murdoch Children's Research Institute

Location: Australia

Category: life-physical-and-social-science

Role Type:Casual role

Salary: \$42.32 - \$56.92 per hour

Location: Parkville (Opportunity to work from home)

Immediate start available

The opportunity:

The Medical Scientist works as part of a collaborative team under the supervision of a Grade 2 Medical Scientist and Section Leader to analyse clinical cases based on cytogenetic and genomic assays. The Medical Scientist helps VCGS to deliver world-leading genetics and genomics services. The role focuses on the analysis of G-banded chromosomes and collection of evidence used to derive interpretative clinical reports. The Medical Scientist efficiently manages her/his workloads to ensure optimal quality (including TATs) and performance standards are adhered to. Depending on the hours worked the position may cover all aspects of the testing procedure, from specimen reception and sample processing to analysis and curation, report generation, LIMS integration, regulatory compliance, and quality management. The role may also require training staff or trainees, trouble-shooting methods or equipment.

What's in it for you?

Enjoy flexible working options

Work in a supportive and energetic environment with our growing team

Located near public transport (Trams 59, 58 & 57) +Discounted onsite parking for employees

We value our employees, which is why we offer a health and wellbeing program including free access to an Employee Assistance Program

Your responsibilities include:

Performing test procedures, data analysis, report writing as directed e.g. G-banded karyotyping, FISH and/ or SNP microarray for a variety of sample types

Maintaining proficiency in all genetic and genomic assays and procedures relevant to current work

Monitoring the performance and operation of laboratory equipment

Ensuring consumers are able to exercise their rights and responsibilities e.g. adherence to MCRI Privacy policies / proper records kept to track samples

Assisting in research and development, including process and quality improvement, method validation and establishment of new services

What we need from you:

Bachelor of Science or Bachelor of Applied Science and/or Honours

(Desirable) MHGSA certification by examination or Master degree/ PhD in human genetics/ genomics

A minimum of 36 months of employment in an IANZ/NATA accredited cytogenetics laboratory, or in any other laboratory with a demonstrable focus on clinically relevant genetics/genomics research

Knowledge of molecular basis of human disease

Demonstrable high level of technical competency in cytogenetic technologies

Who we are

The Victorian Clinical Genetics Service (VCGS), a not-for-profit subsidiary of the Murdoch

Children's Research Institute (MCRI), offers integrated genetic testing, diagnostics, and counselling globally. Our experts collaborate closely to ensure accurate interpretation of complex genetic tests. VCGS is actively involved in driving translational research, policy development, and fostering an inclusive and positive working environment that values diversity and prioritizes equal opportunities for all. We are dedicated to developing our staff and creating a culture centred on respect and continuous learning.

Join us!

We welcome individuals of diverse genders, ages, ethnicities, cultural backgrounds, abilities, religions, and sexual orientations in our workplace. We actively encourage talented individuals from all walks of life to apply for our job openings. Our commitment lies in fostering a workplace that is barrier-free and inclusive, aiming to attract the most skilled candidates.

If you feel this role is right for you, please apply with a copy of your resume

Please note you are not required to respond to the selection in the position description but answer essential questions to determine your eligibility.
