

## Principal Business Analyst | Content Management Platform

[Apply Now](#)

Company: Hudson RPO

Location: Brisbane

Category: other-general

Initial contract until December 2024 with possible extension paying from \$950/day Brisbane City Fringe location with flexibility to WFH 2 days per week Our client, a large complex organisation within the education sector, are currently seeking a Principal Business Analyst for an enterprise content management platform implementation project. The successful candidate will be responsible for unpacking the problem space, articulating the business and user needs from a new solution, gathering and documenting requirements, and mapping current, transitional and future-states operational states. Must have strong analytical and communication skills (written and verbal), with an advanced ability to collaborate and facilitate discussion with business, technical and project stakeholders to gain consensus on the way forward. Previous experience implementing content management platforms would be highly desirable. Principal Business Analyst will play a key role in leading, managing and coordinating the translation of business improvement ideas into tangible business changes and solution specifications that will achieve the desired outcomes of the program and realise benefits across the organisation. Initial contract until December 2024 with possible extension paying from \$950/day Brisbane City Fringe location with flexibility to WFH 2 days per week Our client, a large complex organisation within the education sector, are currently seeking a Principal Business Analyst for an enterprise content management platform implementation project. Must have strong analytical and communication skills (written and verbal), with an

advanced ability to collaborate and facilitate discussion with business, technical and project stakeholders to gain consensus on the way forward. Previous experience implementing content management platforms would be highly desirable. Principal Business Analyst will play a key role in leading, managing and coordinating the translation of business improvement ideas into tangible business changes and solution specifications that will achieve the desired outcomes of the program and realise benefits across the organisation. To be successful in this role, the Principal Business Analyst will have: Strong experience in deploying enterprise technologies across large, highly complex organisations A systems-thinking mindset that places the customer at the centre of business and technology change Strength in establishing and maintaining effective relationships with affected stakeholders across diverse organisational groups A demonstrated history of applying best-practice techniques across a complete delivery lifecycle, ultimately ensuring complete traceability from business problem to the change/solution being introduced Demonstrated experience working in a cross functional, multi-project delivery environment that realises outcomes and changes concurrently This position reports to the Delivery Manager for supervision and workload management. Key responsibilities include: Lead and manage business and solution analysis activities across the program/project organisation Work closely with program, business and technical stakeholders to effectively discover, define, validate, prioritise and continuously manage requirements that translate identified needs into solution outcomes which align with architectural principles and strategies. Effectively facilitate sessions with diverse stakeholder groups, leveraging best-practice techniques and methodologies (such as design and systems thinking) to achieve desired objectives and outcomes. Complete detailed and traceable solution specifications, owning the development and quality of the Business Requirements and Functional Specification that are translated into User Stories to inform development. Collaborate with technical specialists, service management stakeholders and relevant subject matter experts to map, document and establish business processes modelling of current, transitional and future states. Provide input into the direction for business analysis activities across the program, including business process modelling, business and solution requirements lifecycle management, and data modelling Analyse and critically evaluate information from multiple sources to support effective solution definition and design activities that consider competing stakeholder views and needs. Analyse and consolidate information to input into the development of the solution options assessments and feasibility studies to ensure that the value proposition is clear, investment is justified,

and business benefits can be realised. Provide plain language advice on technical issues to non-technical audiences. Contribute to system, integration, user acceptance and production verification testing cycles by preparing and executing test plans and scripts. To submit your application, in strict confidence, please submit your resume in Word Format using the appropriate link quoting reference No. 237296. Should you require further information please email \*\*\*\*\* Your interest will be treated in the strictest of confidence. #J-18808-Ljbffr
