Position: Principal Cybersecurity Consultant Location: Sydney, Australia Role Type:

Hybrid Stickmancyber is a leading Cybersecurity as a Service (CSaaS) company based in Sydney, Australia. We are committed to providing comprehensive cybersecurity services and are developing a global cybersecurity platform. We are looking for a seasoned Principal Cybersecurity Consultant who will also function as a Consulting/Virtual CISO for our clients. This role is central to delivering strategic cybersecurity guidance, conducting in-depth risk assessments, and ensuring compliance with various information security standards and responsible for operationalizing cybersecurity across various clients.

Job Description

Develop and implement comprehensive cybersecurity strategies that align with client business goals.

Ability to design and implement secure-by-design frameworks, zero trust frameworks and data protection strategies in various IT environments.

Strong knowledge and experience in Information Security Management System (ISMS) implementation.

Conduct risk assessments, recommend mitigations and planning and execution of remediation.

Ensure compliance with standards such as ISO 27001, ISO 27005, PCI DSS, NIST, and SOC2.

Plan and execute Vendor Risk Management programs.

Perform or assist with internal & external IT audits, application control reviews, IT process reviews, and IT infrastructure reviews.

Develop and update Standard Operating Procedures where appropriate

Create and revise cybersecurity policies and procedures where required

Lead incident response activities and investigations in collaboration with SoC teams.

Provide advisory on cybersecurity training and awareness programs for clients.

Present to Leadership teams and Board on emerging threats in cyber and success stories

Excellent knowledge of information security technologies, tools and methodologies.

Proficiency in Privileged Access Management, Identity & Access Management, Data Loss Prevention and other disciplines of cybersecurity is advantageous.

Understanding of cloud architectures (e.g., AWS, Azure, Google Cloud) and cloud-native security principles.

Experience in implementing and managing cloud security controls and best practices to protect cloud environments and services.

Strong knowledge of data privacy laws and regulations such as GDPR, CCPA, and Australian Privacy Principles (APPs).

Ability to design and implement privacy-by-design frameworks and data protection strategies in various IT environments.

Familiarity with AI and machine learning technologies as applied to cybersecurity.

Experience in leveraging AI for threat detection, predictive analytics, and automation in security operations.

Keeping abreast of emerging technologies and cybersecurity trends, including IoT security, quantum computing implications, and blockchain.

Requirements

Extensive experience in Information Security, IT audits, and IT Risk Management.

Strong understanding of and experience with information security standards and frameworks.

Relevant cybersecurity certifications (e.g., CISSP, CISM, CISA).

Excellent communication and leadership skills.#J-18808-Ljbffr
