

## Project Manager & Project Engineering - Randstad

[Apply Now](#)

Company: Randstad

Location: Australia

Category: computer-and-mathematical

Randstad has partnered with a specialist in C&I and utility scale Battery Energy Storage Systems (BESS) in Australia and abroad! As Australia continues to increase its adoption of renewable energy, our client is offering cutting-edge, plug-and-play turnkey solutions. We are seeking a Senior Project Manager that will play a highly important role in overseeing a portfolio of projects from initiation through to execution.

Reporting to the General Manager, these are things you will be tasked with doing:

- Overseeing a portfolio of small to medium sized projects.

- Strong emphasis on C&I and utility scale BESS projects, cost / program planning, stakeholder management, OH&S & compliance.

- Supervising and mentoring junior project specialists in the business.

In essence, if you have worked in a similar role for a company either in Power & Renewables or Infrastructure at a high level then these responsibilities should be second nature. As well as working in a similar role, my client is keen to look at candidates with the following:

- Proven experience managing a portfolio of small to medium sized projects, ideally bringing 12+ years post-graduate experience.

- Minimum Tertiary qualification or equivalent experience working in either Power & Renewables or Infrastructure sectors.

- Strong commercial acumen and leadership skills.

Ambition, drive & the hunger to progress and better yourself.

Roles like this don't come up too often, so please do not miss out. Get in touch with myself (Marko Durdevic) at our Melbourne office to find out more (marko.durdevic@randstad.com.au / 0401 353 998).

At Randstad, we are passionate about providing equal employment opportunities and embracing diversity to the benefit of all. We actively encourage applications from any background.
