About the job SAS - Analyst

Job Description:

Key Skills

3+ Years' experience in analytics, economics, insights or other quantitative analysis within a corporate environment.

Experience in SAS programming language.

Experience with data visualization with Tableau or other tools would be advantageous.

Proven ability to undertake complex data and statistical analysis using relevant tools.

Uses analytical techniques to provide data-driven recommendations and reports results in a meaningful, logical and concise manner

Diagnose reporting and analytics problems to understand the root causes, including gathering and analyzing data.

Design, develop and implement interventions to address the root causes, improving the governance, process, technology and people components in collaboration with SMEs.

Provide input into project management artefacts including schedule, risk and issue registers and status reporting.

Key Responsibilities

Works on complex problems where analysis of situations or data requires an in-depth evaluation of various factors. Specifically formulates and defines business and operational data requirements through research and fact-finding.

Works closely with internal stakeholders to identify and clarify basic to moderately complex business requirements.

Succinctly converts business requirements into scope of work with clear timelines, roles and responsibilities for delivery.

Interrogates the data warehouse and extracting relevant data for a range of adhoc and regular projects and reports.

Provides value added analysis and insight to internal and external stakeholders.

Ensure health services data is leveraged to maximum commercial and operational advantage.
