About the job Security Architect

Job Description Of Security Analyst in Sydney :

We are seeking to engage the professional services of a Cyber Security Architect in the Cyber Security and IT Resilience team to assist with projects.

The resources shall be available to commence work between 29th Jun to 6th Jul 2022 for an initial period of 6 months, with likely extension for the right candidate for another 6 to 12 months, subject to performance

The resources will need to have previous experience working with an IT and OT environment like SA Power Networks and must have experience with: Working in partnership with technology services owners and leaders and provide architectural services to deliver projects Support OT delivery teams to prepare for future planning and scoping technical solutions Support OT delivery and operational teams with technical architecture advice and leadership Executive influence and relationship building with senior business and OT stakeholders Document architecture deliverables in SPARX Enterprise Architecture repository and develop and present summaries to senior leaders Maximising and communicating the value of Cyber Security Working in an agile environment, having an Agile mindset will be critical to the success of the engagement Engaging senior management and diverse stakeholders with a customer-centric mindset High-level communications, both verbal and written To enable a good cultural fit, the resource will need to be: Dynamic and flexible to respond to the changing needs of the business Creative and can think outside the box for innovative solutions And will act in alignment with the IT Guiding Principles: Be

Dynamic Always EvolvingChallenge and Be ChallengedBe Mindful

Scope of works include the creating and documenting the cybersecurity Requirements for Dynamic Exports, including:Requirements for Inverters Requirements for Cloud Aggregators Scaling materiality thresholds for requirements Other duties to be performedRequirements mapping to threats/risks as all requirements will be scrutinised by vendors for their credibility Align requirements to apply to EV Charger subsidy tech spec (another SA Gov initiative) Analysis to take place with full end to end solution in mind from SAPN back-end OT systems, through to customer equipment (This was something Nathan M mentioned would be ideal) Input to technical specification for production scale utility server (this is likely to be complete prior to onboarding this resource but we could still add requirements as a variation) Represent SAPN and provide input to national conversation on cyber standards through DEIP ISOGap analysis of the existing 2030.5 interface
