ABOUT THE POSITION.

As a Senior BIM Modeler, you will play a key role in their design process by leveraging Building Information Modeling (BIM) software to create accurate digital representations of their projects. Working closely with architects, engineers, and other stakeholders, you will transform conceptual designs into detailed models that inform decision-making, streamline collaboration, and enhance project outcomes.

DUTIES.

Collaborate with project teams to understand design requirements and ensure BIM deliverables align with project goals

Implement best practices for BIM standards, protocols, and workflows to maintain consistency and efficiency across projects

Conduct clash detection analysis and resolve conflicts to optimize design coordination and minimize rework

Provide guidance and mentorship to junior BIM modelers, fostering their professional growth and development

SKILLS AND EXPERIENCE.

Bachelor's degree in Engineering

Minimum of 5 years of experience in BIM modeling, preferably within the engineering sector

Proficiency in BIM software such as Revit and AutoCAD

Excellent problem-solving skills with the ability to identify and resolve design conflicts efficiently

Effective communication and collaboration skills, with the ability to work well in a multidisciplinary team environment

Proven leadership abilities, including experience mentoring junior staff and coordinating project deliverables

CULTURE.

Our client are a hard working team of industry professionals who take pride in celebrating the success of one another. As part of a close knit team, everyones success is valued where regular company events are hosted to take a moment to honour hard work.

BENEFITS.

Competitive salary commensurate with experience

Opportunities for career advancement and professional development

Flexible work arrangements

A collaborative and supportive work culture that values diversity and creativity
