Company: University Of Melbourne

Location: Melbourne

Category: other-general

Senior Bioinformatician, Bioinformatics Training Job no: 0062191

Location: Parkville

Role type: Full-time

Faculty: Faculty of Medicine, Dentistry and Health Sciences

Department/ School: Melbourne Bioinformatics

Salary: Level C - \$140,433 - \$161,926 p.a. plus 17% super

Delivering a robust bioinformatics training program to empower life scientists. Opportunity to shape and lead education initiatives within a dynamic research environment containing a team of highly skilled bioinformaticians. Salary packaging, subsidised health and wellbeing services, fitness and cultural clubs, Myki discounts, and a 25% discount on graduate courses to our staff and their immediate families! About the Role

The purpose of the role within Melbourne Bioinformatics is to lead the training operations, overseeing a team of trainers and contributing to the development and delivery of bioinformatics content. This involves creating new training materials, delivering workshops, and establishing an online repository for easy access to resources. The Senior Bioinformatician will collaborate with external partners to enhance expertise and align training with national initiatives, ensuring content is comprehensive and of high quality. They will provide strategic oversight to ensure training targets are met effectively and efficiently.

Your responsibilities will include:

Lead the development and provision of local bioinformatics training content, including in-person workshops and stand-alone online content. Identify high-quality training content from external

sources that should be linked to our local training repository. Oversee the organisation of our local training repository. Develop new training materials in accordance with community needs, as determined through consultation with our local users and the national training network. Who We Are Looking For You will thrive in this role if you possess strong communication, leadership, and networking abilities, coupled with adept stakeholder management and attention to detail. Your demonstrated capacity to work both independently and collaboratively within a team, combined with excellent organisational and leadership skills, will ensure successful project outcomes

You will also have:

A PhD or equivalent experience or over 2 years working in bioinformatics or a closely related field. A passion for transferring knowledge and teaching and the ability to apply highly technical skills and content within a teaching environment. Assess effectiveness of existing and new training courses and make modifications to course content. Demonstrated knowledge of current tools, standards, and methods in bioinformatics. For further information regarding responsibilities and requirements, please refer to the attached PD.

Your New Team - Melbourne Bioinformatics Melbourne Bioinformatics, nestled within the vibrant hub of Australia's life sciences, empowers researchers with cutting-edge tools and expertise. From software development to bioinformatics training, it accelerates scientific discovery and fosters collaboration. Since its inception, Melbourne Bioinformatics has propelled Victoria to the forefront of life sciences, generating impactful insights that benefit health, agriculture, and engineering, enriching both academia and industry alike.

What We Offer You!

In addition, we offer the opportunity to be part of a vibrant community and enjoy a range of benefits, including generous leave provisions, salary packaging, health and well-being services and discounts on graduate courses. For more information, check out our benefits page!

About the University of Melbourne We're tightly connected with the community, both at home and abroad. We take pride in our people, who all contribute to our mission to benefit society through the transformative impact of education and research. Discover more via our website and stay connected with our stories and people on .
