C++ Developer - One of the industry's truly pioneering FinTechs's are looking for a C++ Developer to join their innovative team. The C++ Developer will have the chance to gain exposure to cutting edge tech on a daily basis. The company is a global algorithmic trading company. They boast an employee centric approach. The team environment is second to none which is not the norm in trading environments, these guys put you first.

You as the successful C++ Developer will be utilising cutting edge financial trading technology and help improve automation and to scale to more exchanges. You will work in a highly skilled team of developers working in a very highly transactional, low latency, multi-threaded environment and be given the chance to bring ideas and innovation to the table.

Looking for a C++ Developer with the following:

Strong background in C++ Software Development, C++17

Knowledge of design, implementation of trading strategies and other components

Ability to optimize existing code

Fluent English, good communication

Python and Java or C# a big bonus aswell as Quant analysis, Linux

Tech Stack Used: C++ 17, prefer C++20, Python, Linux, Quant analysis, Scala

If this opportunity speaks to you, please apply through the portal with relevant CV aligned to job requirements attached!
