Company: Taylor Thomson Whitting

Location: Haymarket

Category: other-general

If you thrive on finding solutions to everyday challenges, are client focussed and keen to develop your career, then this role is for you!

For the right candidate this is an amazing opportunity to work with one of Australia's leading professional engineering firms in an environment which encourages collaboration, communication and innovation. Due to up-coming and on-going projects we are looking for a Senior Civil Engineer with Hydraulic modelling experience to join our North Sydney office. Your role will be to provide technical expertise on a wide variety of public and private sector projects. This position offers exposure to a landmark projects and excellent career progression opportunities. The ideal candidate for this role will have 5 to 8+ years' experience. Previous exposure to major campus developments in a multi-disciplinary team is highly regarded. Technical expertise in stormwater (including water quality and OSD), external levels, pavements, and external service coordination would be favourably considered. As the successful candidate you will have/be able to:

Complete hydrological and flood modelling assessments, including the use of a range of modelling software packages

Hands on experience with TUFLOW, DRAINS, Music and AR&R 2016 procedures
A minimum 5 years hydraulic modelling experience in Australia
Prepare flood modelling inputs to flood mapping
Undertake spatial analysis to support data analysis and preparation of results
Contribute to project planning and ensure projects are delivered within program and budget
Produce designs, documentation, specifications, fee proposals, reports, and other documentation to meet client requirements for projects of reasonable complexity under the

guidance of senior staff
The ability to manage medium to large scale projects
The ability to mentor, guide, and train younger professionals in the civil group
Liaise and coordinate with builders, architects, and services engineers on design issues
Ensure compliance with applicable Codes and policies – e.g., WHS practices and Quality Assurance
The above position provides an excellent opportunity to join an established and continually expanding consultancy, as well as an attractive salary and benefits for the right candidate.
Who are you? We are seeking a diversely experienced, qualified professional with a great work ethic.

Proactive candidates with a focus on quality, attention to detail and creative critical thinking looking for a stable, rewarding career will be suited for this role.
The Company
