Senior Data Architect – AI/ML, Databricks

Senior Data Architect – AI/ML, Databricks

Permanent opportunity with Tier 1 Bank

Location: Melbourne CBD

Salary on offer upto \$200,000 (Inc. Super) / annum ((Negotiable for the right candidate) + Bonus + other perks!

Must have min 15 years of work experience and atleast 5 years exp in Architecting/Designing/building Bigdata/Datawarehouse platforms, good exposure to Databricks, AWS/Azure certifications

Work life balance, discounts on home loans etc.

About the role

The role requires architecture skills to author the target state architecture, oversee delivery, author high level solution architectures, provide architecture advice to other areas of the bank, and work with the data governance team to ensure strategy and alignment.

Key responsibilities

Lead and drive the definition of the overall architecture for the “IT Solution” in a project/program

in a way that complies with and advances overall enterprise architecture

Ensure that overall architecture is agreed and endorsed by all stakeholders and identifies and evaluates possible solution options

Identify opportunities and ensure fit to enterprise architecture and standards, and manage any architecture issues/exemptions required

Ensure the architecture is implemented in accordance with design over entire lifecycle of project/program, and manage changes to design by ensuring stakeholders are informed and in agreement with any changes

Responsibility for the traceability of solutions against project/program objectives and requirements.

Key skills and experience

Extensive experience as a Data Architect, with expertise in Databricks (essential), along with other data lake, AI/ML technologies (Snowflake, Spark, Hive, Beam, etc.)

Knowledge of both contemporary (Azure/AWS) and traditional (Oracle Exadata, Teradata, etc.) data lake and data warehouse technologies

Knowledge of metadata management (Informatica EDC, Axon)

Proven knowledge of data lineage and data catalogues

Experience with implementations of the Datavault 2 model, architecture, and methodology (CDVP2 or equivalent)

Skilled at business requirements analysis and designing solution architectures

Excellent soft skills, including stakeholder management

Development and evolution of target state architectures

QA of technical delivery.
