Company: SKL Actuarial

Location: Sydney

Category: computer-and-mathematical

Permanent roles within a dynamic insurance business | Opportunity to work on projects across a number of divisions

Our client has approval for a number of Senior Data Scientist & Data Scientist roles within their Group Data division. The team is currently 4 in size and they are looking to double due to an increasing need to develop their Machine Learning and Deep Learning capabilities. They are looking for a mix of experience levels and technical strengths.

Key Responsibilities includes:

Establish a Data Science platform on AWS, building in machine learning capability and a range of statistical models

Play a role in thought-leadership to promote best practice data science within the organisation

Work with structured and unstructured data sets, build analytical models using R & Python

Utilise machine learning tools to drive more efficient and accurate outcomes

Work closely with project teams from initial conception to delivery and interact with a range of senior business stakeholders

About you:

5-10 years' experience as a Data Scientist (or equivalent)

Strong experience required working with AWS tools and platforms, SageMaker (or equivalent) highly preferable

Strong technical background in at least two of SAS, R and Python

Financial services/insurance knowledge beneficial

Passion for machine learning, professional development

Innovative thinking and willingness to experiment

Strong communication skills and the ability to work in teams.

Our client provides a great learning culture and is investing heavily in new technology.

WFH/hybrid model with Sydney CBD office location.
