Company: Calibre Rail Pty Ltd.

Location: Perth

Category: other-general

2 days ago Be among the first 25 applicants Enjoy continuity of work & some stability Major non-processing infrastructure project with a Tier 1 mining operator Flexible start & finish times to suit your commitments outside of work Enjoy continuity of work & some stability Major non-processing infrastructure project with a Tier 1 mining operator Flexible start & finish times to suit your commitments outside of work Why you should choose us There's plenty of current and new projects on the horizon that will keep you engaged at Calibre. Our WA team continues to deliver design expertise for an array of mining and infrastructure projects. Minimum 18 months of base and detailed design work. Well-established knowledge of our client's assets, procedures and systems. Approachable Engineering Manager that trusts you to work independently. Work with some of the best technical minds in the industry. You'll be joining an initial project team of up to 35, which will grow. Your chance to influence key design outcomes from the start. Want to be part of a group that strives to deliver on our promises, and is respected for that? We turn knowledge into value for our clients. Calibre Mining & Infrastructure is a trusted advisory and engineering services provider to the WA resource sector. With a successful track record of over 20 years in the design and execution of \$30bn+ in projects, our comprehensive capability covers the entire project life cycle. Calibre has many boomerang employees – people that leave and return. We have some Engineers who have been with us for more than 6 years. This tenure speaks for itself, people genuinely enjoy working here. Join us. Make great projects work This could be your chance to be a part of significant engineering studies which will enable our client to sustain mining operations and develop new sites. (Project value \$1Bn +) We'll be asking you to provide technical expertise

and advice during base design and detailed engineering studies. You Can Also Expect To Be Carrying out technical evaluations and recommending appropriate electrical equipment solutions. Designing and creating specifications for mining systems across LV distribution and controls. Producing and reviewing engineering documentation (technical drawings & scope of works). You'll be trusted to devise practical recommendations, identify risks and ensure compliance with Calibre, industry and client technical standards. Thrive with us! We hope you'll bring Bachelor of Electrical Engineering (recognised by Engineers Australia). 8+ years of engineering design experience. Well-developed communication and interpersonal skills. A keen eye for detail, good time management and a knack for problem-solving. Current right to work in Australia. Whilst it's preferred you have experience in the mining sector, what's more important is your knowledge of non-processing infrastructure (supply & distribution pipelines).

Here's What You Can Expect At Calibre Want to work with people that really care? What you do matters and so do you. Your efforts and achievements will be recognised – you'll never just be a number. A knowledgeable team of peers and managers. Generous employee referral incentives. Staff or contractor, you'll be respected – we're all one team. Support to stay safe and well, so you can be your best at work and home. Sharing of information & collaboration across projects. Flexible start & finish times (within core business hours). Be yourself at Calibre We want every individual to truly feel like they belong when at work. Diversity and inclusion is a key part of our culture and success. Interested? We're ready to hear from you If you're ready to make your move, Apply Now or contact Naomi Paik if you require further information – 6375 5115.
