Senior Electronics Engineer

Central Sydney

Circa $125,000 + super

Permanent, full time

Fast-growing global brand, based in Sydney, is looking for a Senior Electronics Engineer to play a key role in their mission to create cutting-edge consumer products that contribute to a healthier and more sustainable lifestyle. This is an exciting opportunity to work for a company with a strong philosophy of well-being and health and wellness community engagement.

About the Company

World-class product development company with corporate awareness of environmental and community impact, delivering first class products that nurture health and well-being. Committed to building a diverse team with differing perspectives, with a shared enthusiasm for food science, health and wellness and for challenging product development norms.

Role andResponsibilities

You will be an experienced Senior Electronics Engineer with a unique blend of electronics hardware development skills, from power electronics to digital circuits and small signal processing using sensors. You will have a strong background in working independently and will be responsible for driving the development of electronic systems for an innovative product range. Experience in collaboration with overseas Contract Manufacturers (CMs) and expertise in motor-driven consumer products will be highly valued. You will also be a humble expert who thrives in small teams and can also serve as a mentor.

Design and optimise electronic solutions for environmentally friendly consumer products

Independently manage and drive electronic engineering projects

Collaborate with Overseas Contract Manufacturers (mainly in SE Asia)

Enhance the performance and functionality of motor driven products

Serve as a mentor and knowledge resource for less experienced team members

Diagnose and resolve complex technical issues related to electronics and product development

Develop and execute comprehensive testing and validation procedures to guarantee product quality and performance

Maintain detailed documentation of design, testing, and implementation processes

Your Skills and Experience

You will have a Bachelor's or Master's degree in Electrical Engineering, Electronics Engineering, or a related field, plus

Minimum of 7 years of Electronics Engineering experience in a relevant role

High proficiency in electronics hardware design, strong knowledge of electronic circuits, schematic capture and PCB design using Altium Designer software

Knowledge of various motor technologies and motor drives is essential

Solid knowledge of product compliance, including EMC regulations

Ability to quickly prototype and create concept designs

Excellent communication and collaboration skills, with the ability to work effectively within a cross-functional team.

Benefits

Flexible work arrangements

Modern office that reflects company's values

Strong culture of well-being and health and wellness community engagement

Competitive Salary, Super & incentives

International travel

Learning & Development training opportunities

N.B. You must possess full, unrestricted and ongoing rights to work in Australia to be considered for this role.#J-18808-Ljbffr
