

## Senior Engineering Logistics Specialist

[Apply Now](#)

Company: Raytheon Technologies

Location: Australia

Category: business-and-financial-operations

### Unspecified

Join an experienced team of accomplished engineers

Apply technical theories and concepts to design real-world solutions

Rapidly grow knowledge through ongoing training opportunities

Location Brisbane QLD, Macquarie Park or Williamstown.

Raytheon Australia is trusted by the Australian Defence Force to deliver some of the nation's most critical engineering and logistics support projects.

Right now, we're in a phase of exciting growth and need the nation's brightest **Senior Engineering Logistics Specialists** to join our team on the Australian Defence Air Traffic System (ADATS) program. ADATS provides ongoing maintenance, engineering, program management and logistics support services to sustain each of the 12 Air Traffic Management sites, including control sites, radars, and other equipment vital for safeguarding Australia's military airspace. In this role you will be involved in the development, introduction into service and sustainment of a range of systems across the program.

Our smart and energised logistics specialists have the knowledge and know-how to apply technical theories and concepts to optimise logistics support systems and deliver innovative solutions to our defence partners.

We depend on our Logistics Specialists to ensure the effectiveness and efficiency of logistics support operations across the full breadth of our programs.

In return, we offer outstanding opportunities to grow, with Raytheon Australia's exclusive professional development programs, and an extensive employee benefits package tailored to suit every stage of your career and lifestyle.

Playing a key role in key projects is just one of the many reasons why it's great to work here.

**The role:**

As a **Senior Engineering Logistics Specialist** for the ADATS program, your responsibilities include:

Performing and managing a variety of engineering and support system modelling and analysis tasks related to the reliability, maintainability, and availability of systems and products.

Developing and reviewing logistics support plans and deliverables in accordance with company policies and procedures.

Assessing, monitoring, and reporting progress for assigned activities against key performance metrics and addressing any logistics support issues.

Developing complex support system models and conducting system and/or product level performance analyses.

**The person:**

Engineering Degree in one of the following disciplines: - Science, Technology, Engineering or Mathematics, or equivalent experience.

A minimum of 4 years of prior relevant experience in integrated logistics support.

Experience in systems engineering, engineering support, maintenance support, technical documentation, and supply support disciplines.

Understanding of technical theories and concepts in support system modelling, analysis, and relevant systems business operations.

Knowledge of integrated logistics systems, logistics support analysis, and maintenance requirements determination methodologies.

Successful candidates must be eligible to obtain and maintain a Baseline Security clearance

as needed. Eligibility can be found at

If you enjoy finding pragmatic solutions to challenging problems and want the opportunity to contribute meaningful projects, then join us.

Simply put - we do great work and it's great to #workhere.
