Company: Law Of The Jungle

Location: Sydney

Category: other-general

Law of the Jungle is an award-winning leader in regulatory technology.

Our marketing compliance platform is redefining how business tackles one of its most debilitating pain points.

We have a 20+ year history in delivering cutting edge cloud-based solutions to major enterprises at the intersection of law, business, marketing and technology.

Our company is bringing to market a solution to end the delays, costs and frustrations associated with marketing sign-off.

Our platform empowers teams to clear compliance demands and slash cost, risk and repetition by closing the knowledge gap which lies at the heart of the problem – in real time.

It's the result of intense R&D and deep involvement with brands, marketers and compliance teams.

We are seeking a talented Senior Full Stack Web Developer to play a pivotal role in launching a groundbreaking innovation in the high-growth global category of RegTech. This is an opportunity for an ambitious, energetic and talented developer who seeks to realise career goals by applying your skill, focus and thirst for learning and by your overall contribution to the success of the product and the growth of the business.

About you

If this sounds like you, we want to hear from you!

You yearn for an opportunity to apply your talents and take a key role in introducing a significant innovation in a high growth global category You are a technology specialist: a

software engineer with strong qualifications who has been well trained in high end development and best software practice.

You may have spent time in a leading software enterprise or in a boutique role delivering to corporates. You are proud to have built contemporary, scalable micro-service based web applications in the cloud. You are an expert with Angular, NgRx, Java, Spring, Python, MySQL and familiar with AWS, Linux and Terraform. You are excited to work at the cutting edge of AI development including neural search, vectors, generative AI and ML. You have the confidence to express your ideas, the humility and good sense to listen well, and you love to learn.

## RESPONSIBILITIES

In this position you will:

Lead hands-on software development across the full stack, from infrastructure to backend and frontend, collaborating closely with the team to deliver features and functionality. Drive the development of key dimensions and features of our enterprise SaaS application, from concept to deployment, ensuring adherence to industry best practices and standards. Conduct research and analysis of system program needs including identifying technology limitations and deficiencies in existing systems and associated processes, procedures and methods. Deliver rapid, regular releases under lean agile development principles. Collaborate with our development team with ideas, designs and solutions that fulfil client and user requirements and our company's standards and requirements.

## BENEFITS

A highly competitive salary package. Professional development budget and leave. Monthly phone and/or internet allowance. Flexible working arrangements.

We are open to both an employed position or a contract position.
