One (1) ongoing Senior Informatica Developer position is being offered in the Business Technology Services Division, Melbourne CBD or Ballarat

One (1) ongoing role being offered in the Business Technology Services Division Salary $130,673 to $152,772 plus 11% superannuation – VPS Grade 6.1 Based in Melbourne CBD or Ballarat with hybrid working arrangements What we offer The State Revenue Office is the Victorian Government's revenue management agency, administering a range of taxes, duties, levies, grants, and subsidies. We aim to develop our people to achieve great outcomes for the Victorian community. We offer flexible working arrangements and a workplace culture that is rewarding and productive, where contributions are valued and recognised, expectations are clear, and treatment is fair and equitable. We are an equal opportunity employer that is committed to providing an inclusive, accessible, and safe working environment.

The purpose of this role is to work within the Strategy, Planning and Data team to use the Informatica Intelligent Data Management Cloud suite of applications to analyse, develop and deploy solutions to meet business requirements, including improved data quality and establish master data management processes.

Reporting to the Manager, Strategy, Planning and Data, you will:

Analyse business requirements and design solutions using the Informatica Intelligent Data Management Cloud suite of products. Manage daily operational support of the Informatica platform and products. Use agile and modern delivery methods, platforms and principles to develop and release solutions. Who we are looking for To be successful in this role, you will

have:

Experience in delivering master data management solutions, leading data transformations and load workflows High level experience in leading and delivering data provisioning for modern reporting and analytics platforms High-level of critical thinking and problem-solving skills to interpret and understand business issues and define appropriate solutions Experience in leading complex data management practices in a technical role How to apply Submit an application via the 'Apply now' button by 11:59pm on 28 April 2024. For your application to be considered, you will need to: provide a cover letter outlining why your skills and experience make you a suitable candidate for this role, and Please note, as part of our selection process, we conduct pre-appointment checks including those related to references, identity, qualifications, work history, work visa, and police record history.

This role may be subject to a probation period.
