Company: Global Blue

Location: Sydney

Category: computer-and-mathematical

Position Senior Engineer Corporate Network

Workload: 100 % FTE

Unit: Technology – I&O - CNT

Reports to: Senior Manager, Corporate Network & Telecommunications

Location: Sydney, Australia

Nature and aim of the position

In this pivotal role as a Senior Network Engineer, you will integrate into a great team of senior network engineers at the forefront of shaping and nurturing our expansive worldwide data center networks.

Your core mandate will involve architecting, designing, implementing, and operating cutting-edge enterprise data solutions, thereby ensuring an impervious security envelope encasing our data centers.

The role challenges you to harmonize efficiency with security, envisaging a network environment that stands not only highly available and automated but also agile, swiftly adapting to evolving needs and technological advancements.

Guided by our strategic vision, you will spearhead initiatives that ensure the professional quality and timely delivery of services, reflecting our steadfast commitment to excellence and innovation as we forge ahead in this exciting chapter of substantial expansion in Australia.

Main duties and responsibilities

The holder of the position is responsible for

- Planning, documenting and performing of network changes/extensions, especially in datacentres
- Orchestration/Automation of firewall rules and underlying network settings
- Designing and documenting the corporate network architecture (LAN/WAN/WLAN/SECURITY)
- Data centre network security consultancy for internal departments & projects
- Operating and monitoring of the corporate network infrastructure
- Providing 2nd level network infrastructure related support
- Designing network aspects of disaster recovery and operational security
- Maintaining, auditing and improving corporate network & security standards
- Performing network related root cause analysis (RCA) and problem resolution
- Defining, monitoring and reporting KPIs for network services/devices
- Managing proof of concepts, feasibility studies etc.
- Investigating into new technologies & security improvements
- Writing of white papers and documentations
- Acting as project leader for network related activities/projects

Reporting and collaboration

The holder of the position reports directly to the Senior Manager, Network & Telecommunications.

The position requires close collaboration within Compute, Security, Field Service, Application Support, Service Center departments and project/product managers.

Profile and education

-Relevant network/IT related education (academic degree preferred)

Excellent understanding of corporate network & data centre application architecture concepts

-Excellent analyzing skills

-Scripting/programming/automation skills

-Excellent understanding of at least four of the technical areas below:

Datacentre security & firewall infrastructure (Multivendor) - mandatory

Datacentre network infrastructure (Cisco) - mandatory

VPN technologies/infrastructure

Network design/management

Network automation

Network technologies (Layer1-Layer4)

- Good communication & technical writing skills
- Good team-player
- Independent, goal-oriented and self-motivating personality
- Passion to deliver high quality standard levels
- Accuracy and high risk awareness
- Excellent English language skills (oral & written)

Willingness to perform standby on-calls

Specific skills and knowledge

- Min 5 years of professional experience as datacentre network engineer
 - Practical experience in enterprise network & security Plan/Build/Run setup
- Work experience within an international/multicultural environment preferred
- Ability to work with teams distributed in different time zones
