Senior Systems Administrator - Microsoft Config Manager

09 Apr 2024

ACT

Contract

Working within End User Services team to provide technical support to staff and customers, playing a crucial role in maintaining a stable and efficient IT environment by leveraging MCM capabilities for software deployment, patch management, and system configuration across multiple environments.

What's involved:

Provide direction on the development, maintenance, and enhancement of the Server SOE in

a client computing environment including the distribution of applications.

Provide direction on the strategic implementation of the Server SOE environment, including

a consideration for Open Standards and Open-Source products as related to

Government business requirements.

Support the implementation of technologies, such as Group Policy, Intune, and login scripts in line with the strategic direction of the Government Dept.

Provide and manage high level support and troubleshooting

including leading the development of solutions to overcome production issues.

Develop and maintain relevant documentation as required for the QMS.

In collaboration with the Security team to ensure the Server SOE complies with the Essential 8 recommendations.

What experience?

Demonstrated experience as a Microsoft Configuration Manager administrator for medium to large scale ICT systems. (ideally minimum exp of 5 years).

Demonstrated experience in Windows Server operating system including Active Directory Management (including Azure Active Directory) and Group Policy.

Demonstrated experience of the management of software and server hardware utilizing MCM and Intune.

Demonstrated experience in using Microsoft Configuration Manager for Microsoft Operating System security patching and reporting.

ITIL qualifications desirable - ability to gain baseline clearance is essential.
