

Senior Technical Consultant/Technical Architect - Mulesoft

[Apply Now](#)

Company: Salesforce, Inc.

Location: Central Coast

Category: other-general

MuleSoft's Professional Services team works across every technology and system to deliver solutions to customers in every industry. As a Technical Architect on our Services team, you will have the opportunity to enable our customers to understand and employ MuleSoft technology hands-on while coaching and mentoring elite members of a fast-paced, growing organization. You will be an influencer and inspiring leader with in-depth technical expertise, credibility, and field experience to establish yourself as a subject-matter expert in a company leading innovation within the integration services industry. What you'll achieve: 3 months: Participate in MuleSoft Technical Product and Consulting Services training, methodology, and enablement Begin participation in field activities with clients by shadowing seasoned architects and practicing enablement gained from training Begin to execute MuleSoft implementations for customers and start on your journey to internalize business outcomes and business context relevance to MuleSoft implementation methodologies and approaches Complete MuleSoft technical certifications and fully ramp on technology and implementation methodologies; start to develop and contribute domain expertise and project deliverables to internal knowledge exchange Begin mentorship and guidance of junior Services team members and help to build out our services organization 12 months Continue to lead technical teams through multi-phased delivery projects and provide hands-on delivery guidance to influence standards for development, governance, and operational life cycle Evangelize frameworks, project deliverables, standard methodologies/policies, and implementations to internal collaboration networks and IP sharing Find opportunities to expand MuleSoft footprint and drive further services and customer service, lead multiple engagements simultaneously,

and drive partnerships and cross-collaboration with MuleSoft partners, SIs, and 3rd Parties

Identify ongoing risks and difficulties throughout project experiences in the field and contribute to developing and implementing internal mitigation measures to meet customer needs

Evangelize, train, coach, and mentor Services team members on hard technical skills and soft skills

Find opportunities and efficiencies in customers' IT operating model, and support implementation of the SLDC pipeline to get greater value out of the MuleSoft platform.

Lead development of technical brown bag sessions and publish/facilitate reusable content to the field

Work with MuleSoft product leadership providing valuable product insight, guiding product direction and features. Deliver compelling presentations, architectural blueprint documents, and requirements-gathering workshops to influence the strategic direction of our projects and lead customers through solution design

What you'll need to be successful:

- Experience leading integration teams and architecting solutions
- Demonstrated experience architecting services integrations with at least two of the following: MuleSoft or other solutions (e.g., IBM, BEA, Oracle Fusion, TIBCO, Dell Boomi, Progress Sonic, etc.)
- API Management solutions (Apigee, Mashery, etc)
- One or more on-premise/SaaS packaged COTS (Commercial Off-the-Shelf) solutions for ERP, CRM, e-commerce, or mobile (e.g. Salesforce.com, NetSuite, Oracle, Siebel, SAP, WorkDay, etc.)
- Demonstrated experience managing and architecting for multiple technical integration projects
- SDLC (Software Development Life Cycle) end-to-end, sometimes simultaneously
- Working knowledge of on-premise/cloud-based infrastructures, SDLC pipelines, and deployments/configurations and definition/evangelism of standard practices/standards
- Demonstrated ability to effectively architect solutions within a diverse technical team of clients, SIs, contractors, and internal teams
- Experience leading technical teams and mentoring junior-level resources, consultants, and clients while leading internal initiatives to grow Services organization practices
- Demonstrated experience with High-Availability, Fault-Tolerance, Performance Testing, and Tuning parameters on multiple engagements
- Demonstrated expertise in architecting, implementing, and supporting enterprise-grade technical solutions meeting complex business requirements while evangelizing integration methodologies and supporting case justification to C-level executives
- Experience driving technical workshops with technical and business clients to derive valuable services and implementations
- Ability to travel up to 75% of the time (varies depending on customer needs, focused within Region)

At Salesforce, we encourage applications from Aboriginal and Torres Strait Islander peoples, people of all ages, people living with a disability, LGBTIQ+ candidates, and people from multi-cultural

backgrounds Salesforce Australia is committed to walking together with the Traditional Custodians of this land, Australia's First Nations peoples, as we forge a path to reconciliation. Please see our Reconciliation Action Plan for more information. #J-18808-Ljbfrr
