Company: Kings Resources

Location: Perth

Category: other-general

### Architects (Information & Communication Technology)

Our client is an established energy and utilities company based in Perth and they are seeking an experienced Solution Architect to join their team.

#### Responsibilities:

Overseeing the development of design documentation for external and internal developers and configuration specialists, provide ongoing guidance to support delivery and perform quality assurance on outputs.

Reviewing and providing quality assurance of solution architecture, designs and implementations carried out by external service providers.

Providing expert advice and communicating solution alternatives, architectural risks, issues and resulting implications.

Assisting in the maintenance of all levels of the cyber security or the ICT architecture for the organisation, collaborating with external and internal service providers, and the business.

Providing input to the strategic direction of technology investments to assist in the development of the enterprise architecture, maximise ROI and reduce risk.

Evaluating and undertaking impact analysis on major architectural options

You must have: Minimum 8 years of recent experience as a Solution/Project, Business or Data Architect and possess significant experience in designing and maintaining solution architecture within a large, distributed ICT organisation  
Competencies relevant to the Solution Architect -

You can be either of the following:

**Business Solution Architect:** Proven experience in designing enterprise applications, corporate BI reporting toolsets and record / document / content / knowledge management technologies

**Operational Technology Solution Architect:** Proven experience in designing SCADA Master Stations, cyber-security systems, related communication systems and other operational, real-time systems

**Data Warehouse Solution Architect:** Proven experience in technical disciplines of data warehousing, BI and reporting, with strong technical expertise in database technologies, ETL and BI tools

**Infrastructure Solution Architect:** Demonstrated experience in designing ICT infrastructure systems, both data centre back-end and desktop environments, including middleware infrastructure, network infrastructure, storage systems and data centre operations

**Cyber Security Solution Architect:** Demonstrated experience in cyber-security related architecture with complex, multi-application and varied infrastructure landscapes. Extensive knowledge of security architecture and design patterns.

Please **APPLY NOW** with your updated resume in Word format and we will contact you for a discussion if shortlisted.

Your application will include the following questions:

Which of the following statements best describes your right to work in Australia?

How many years' experience do you have as a solutions architect?
