As a global leader in cybersecurity, our team changed the game. Since our inception, our market leading cloud-native platform has offered unparalleled protection against the most sophisticated cyberattacks. We're looking for people with limitless passion, a relentless focus on innovation and a fanatical commitment to the customer to join us in shaping the future of cybersecurity. Consistently recognized as a top workplace, CrowdStrike is committed to cultivating an inclusive, remote-first culture that offers people the autonomy and flexibility to balance the needs of work and life while taking their career to the next level. Interested in working for a company that sets the standard and leads with integrity? Join us on a mission that matters - one team, one fight.About the Role:CrowdStrike is looking for highly motivated, self-driven, Cyber Security analyst dedicated to making a difference in global security by protecting organizations against the most advanced attackers in the world. Our CrowdStrike virtual security operations center offers opportunities to expand your skill set through a wide variety of experiences, detecting and responding to incidents as they occur in real-time for our customers. Am I a Senior Analyst, Endpoint Protection Team Candidate? Do you find yourself interested in putting your hands-on technical skills to the test in detecting, containing, and remediating incidents? Are you self-motivated and looking for an opportunity to rapidly accelerate your skills?Do you

crave new and innovative work that actually matters to your customer? Do you have an Incident Response or Information Security background that you're not fully utilizing? Are you capable of leading teams and interacting well with customers? Do you love working around like-minded, smart people who you can learn from and mentor on a daily basis? Willing and able to work your allocated shift as part of our global, follow the sun team? The allocated shifts are all daytime shifts, and span either Mon to Fri, Wed to Sat or Sun to Wed for a 38-hour work week. The shifts incorporating weekend days are 4-day work weeks with slightly longer work days compared to the 5-day work week shift. Changes of an allocated shift can be considered depending on operational requirements.

What You'll Do: Exercise incident handling processes across Windows, Mac, and Linux platforms. Perform basic malware analysis. Develop and improve processes for incident detection and the execution of countermeasures. Produce high-quality written and verbal communications, recommendations, and findings to customer management. Demonstrate industry thought leadership through blog posts, CrowdCasts, and other public speaking events. Manage internal programs or teams.

What You'll Need: Working in a SOC, Malware Analysis or IR environment

Incident Handling: experience conducting or managing incident response for organizations, investigating targeted threats such as the Advanced Persistent Threat, Organized Crime, and Hacktivists.

Computer Forensic Analysis: a background using a variety of forensic analysis tools in incident response investigations to determine the extent and scope of compromise.

Systems Administration: an understanding of system internals is required to understand how to implement and execute countermeasures and remediation.

Network Forensic Analysis: knowledge of network protocols, network analysis tools, and ability to perform analysis of associated network logs.

Malware Analysis: ability to perform static and dynamic malware analysis to understand the nature of malware

Incident Remediation: strong understanding of targeted attacks and able to create customized tactical and strategic remediation plans for compromised organizations.

Network Operations and Architecture/Engineering: strong understanding of secure network architecture and strong background in performing network operations.

Programming/Scripting: experience coding in C, C#, VB, Python, Perl, Ruby on Rails, and .NET. Applicants with hands on experience with Python, especially for efficiency initiatives or in a Cyber Security context, are encouraged to apply. Applicants that have undertaken SEC573 and SEC673 are also strongly encouraged to apply.

Capable of completing technical tasks without supervision. Desire to grow and expand both technical and soft skills. Strong project management skills. Contributing thought leader

within the incident response industry. Ability to foster a positive work environment and attitude. Strong verbal and communication skills of difficult technical concepts to audiences with varying levels of technical ability. (candidates with Japanese written and verbal skills are highly encouraged to apply) #LI-BS1 #LI-Remote Benefits of Working at

CrowdStrike: Remote-first culture Market leader in compensation and equity awards with option to participate in ESPP in eligible countries Competitive vacation and flexible working arrangements Physical and mental wellness programs Paid parental leave, including adoption A variety of professional development and mentorship opportunities Access to CrowdStrike University, LinkedIn Learning and Jhanna Offices with stocked kitchens when you need to fuel innovation and collaboration Birthday time-off in your local country Work with people who are passionate in our mission and Great Place to Work certified across the globe We are committed to fostering a culture of belonging where everyone feels seen, heard, valued for who they are and empowered to succeed. Our approach to cultivating a diverse, equitable, and inclusive culture is rooted in listening, learning and collective action. By embracing the diversity of our people, we achieve our best work and fuel innovation - generating the best possible outcomes for our customers and the communities they serve. CrowdStrike is committed to maintaining an environment of Equal Opportunity and Affirmative Action. If you need reasonable accommodation to access the information provided on this website, please contact Recruiting@crowdstrike.com , for further assistance. About Us CrowdStrike was founded in 2011 to fix a fundamental problem: The sophisticated attacks that were forcing the world's leading businesses into the headlines could not be solved with existing malware-based defenses. Founder George Kurtz realized that a brand new approach was needed — one that combines the most advanced endpoint protection with expert intelligence to pinpoint the adversaries perpetrating the attacks, not just the malware.
