

Systems & Process Engineering - Worley

[Apply Now](#)

Company: Worley

Location: Perth

Category: other-general

About the job

We're looking for a **Safety & Risk Engineer** to join our **Perth** team.

When you work for us, you get the chance to join nearly 50,000 people all driven by a common purpose – delivering a more sustainable world. We're excited about the challenges ahead. If you ask us, there's never been a more rewarding time to work in the energy, chemical and resources sectors.

We offer a flexible approach to working, because our people are safer, healthier, and more productive when they can balance work with life. That's why we offer flexible and hybrid working options, so you can choose when, where and how you work.

As a **Safety & Risk Engineer** you will be responsible for providing the advice and partnering with our clients to implement that advice, we are a practical, innovative, results-driven organisation with a singular focus on the success of our clients. We are open, honest and direct, and we deliver what we promise. We advise, then deliver.

Who we are

Worley is a global professional services company of energy, chemicals and resources experts headquartered in Australia.

Right now, we're bridging two worlds as we accelerate to more sustainable energy sources, while helping our customers provide the energy, chemicals and resources that society needs now.

We partner with our customers to deliver projects and create value over the life of their portfolio of assets. We solve complex problems by finding integrated data-centric solutions

from the first stages of engineering and consulting to the last stages of installation and commissioning.

Join us and help drive innovation and sustainability in our projects.

What you'll do

We're looking for a **Safety & Risk Engineer** to join our **Perth** team

The role responsibilities include:

Safety studies for various project phases from conceptual to brownfields modifications including Fire Safety Studies, Escape and Muster Studies, Equipment Survivability Studies, QRAs, safety case and SCE impact assessment to support the demonstration of ALARP and recommend actions

Deliver safety & risk engineering services that meet applicable statutory and regulatory specifications, on time and within budget.

Be able to participate in the facilitation of workshops including HAZOPs, HAZIDs and LOPA.

Prepare technical reports and assist in the presentation of technical issues to clients.

What you'll have

Relevant years of Safety & Risk experience.

Experience in the Oil & Gas, Mining and Chemical industries.

Great communication skills both written & verbal.

Kept up-to-date with the latest developments and technical innovations in safety & risk engineering.

Good knowledge of safety & risk engineering, and good understanding of the requirements of other engineering fields.

Familiar with applicable local and international standards and statutory and regulatory specifications.

A recognized degree in the relevant engineering discipline or equivalent.

Why you should apply

Flexible work arrangements

Take advantage of our global on-line learning platform!

Competitive rem & employee benefits

Enjoy a varied & challenging role

Career development opportunities beyond this role

Moving forward together

We want our people to be energized and empowered to drive sustainable impact. So, our focus is on a values-inspired culture that unlocks brilliance through belonging, connection and innovation.

We're building a diverse, inclusive and respectful workplace. Creating a space where everyone feels they belong, can be themselves, and are heard.

And we're not just talking about it; we're doing it. We're reskilling our people, leveraging transferable skills, and supporting the transition of our workforce to become experts in today's low carbon energy infrastructure and technology.

Whatever your ambition, there's a path for you here. And there's no barrier to your potential career success.
